

Is n19w99.co.uk safe? TrustSniffer's low-trust assessment: 40/100

n19w99.co.uk

Verdict

40

OUT OF 100

LOW TRUST

n19w99.co.uk is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

N19W99 corporate site for production services founded in 2016. Describes services (vendor handling, risk assessment, security, payroll, crew handling), invoicing instructions including company billing details and payment email contacts, contact form (not active without reCAPTCHA), and office address in London.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What n19w99.co.uk served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

N19W99.co.uk presents itself as a corporate production-services business supporting filmed content and commercial projects through vendor handling, risk assessment, security, payroll, crew management, logistics, and related financial administration.

Scam/Impersonation Risk

The site's pages are professionally structured and describe a coherent business model, with no observed login form, wallet connection, hidden sensitive form, or explicit brand-impersonation indicator. However, this benign presentation is outweighed by confirmed external contradiction signals: the domain is blacklisted, and multiple external detections classify it as malicious or suspicious. The associated abuse reporting is attributed to shared OVH infrastructure rather than conclusively to the website itself, but the combination of blacklist status and malicious detections warrants a clearly cautionary posture for credentials, payments, and other sensitive interactions. The site's apparent business presentation therefore does not establish that the operating entity or payment destination is trustworthy.

EVIDENCE

- The homepage and services pages describe production logistics, vendor handling, risk assessment, security handling, payroll support, and crew handling without an observed login or wallet-connect workflow.
- External reputation telemetry records a confirmed blacklist hit and 2 malicious plus 1 suspicious detections for the evaluated domain.
- The hosting IP, 148.113.170.126, has 101 abuse reports attributed to shared infrastructure, with a confidence score of 100.

Regulatory Verification Notes

The About, Services, FAQ, Contact, and invoicing materials provide a business description, a London office address, project-management references, and payment instructions, but the reviewed materials do not independently establish the legal operator. No license, registration number, or clearly identified regulatory authority is presented for verification. This is a disclosure and verification gap rather than a standalone determination of fraud. The site's own content is consistent with a production-support service provider, while the external reputation signals remain materially adverse and should not be treated as a regulatory finding.

EVIDENCE

- The About page states that the business was founded in 2016 and claims to have handled hundreds of television commercials for global brands.
- The FAQ and invoicing materials describe user registration, purchase-order handling, invoice submission, and payment administration.
- Domain registration telemetry: registered 2016-01-19T18:10:59Z; age 10.59 years; expiry 2028-01-19T18:10:59Z.
- Hosting telemetry: served on AS16276, OVH - OVH SAS, FR; TLS certificate issued by YR1 at DV validation level, valid to 2026-09-20T07:49:11+00:00.

What to Verify Next

Before any sensitive interaction, an organization should independently confirm the operator's legal identity and London office details through authoritative corporate records, validate whether the services require sector-specific registration, and confirm payment instructions using a previously established offline contact route. Any proposed engagement should also be supported by a contract, independently confirmed purchase order, and payment-protection controls; credentials should not be provided unless the relevant identity and access process has been independently authenticated.

EVIDENCE

- The Contact page contains a contact form that is not active without reCAPTCHA, limiting direct confirmation through that mechanism.
- The FAQ identifies a project-manager-controlled user-registration process and describes invoice and purchase-order workflows.
- The reviewed site materials include an office address and company billing details that can be checked against independent records.

Summary Verdict

The website has a coherent corporate-service presentation and a long-standing domain registration, but its overall posture is **low trust with elevated sensitive-interaction risk**. Confirmed blacklist and malicious-detection signals create a material contradiction that prevents the site's professional appearance from supporting normal credential, payment, or confidential-data use. The real-world operator remains unverified.

Infrastructure Integrity

The site is protected by a CDN/WAF layer, and the observed address is an edge address; the origin server was not observable in this analysis. This reduces direct exposure of the origin and is a mitigating infrastructure characteristic, but it does not establish legitimacy or offset the adverse reputation evidence.

Closing Assessment

Engagement should remain limited to non-sensitive review until the operator, contractual counterpart, and payment destination have been independently authenticated through trusted channels.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- A large share of what the page loaded came from other domains.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_MODERATE

Signals weighed against the site

- AbuseIPDB: 101 reports on hosting IP 148.113.170.126 (OVH Hosting, Inc., Data Center/Web Hosting/Transit), 100% confidence. The reports are attributed to shared infrastructure, not specifically to this

website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of n19w99.co.uk.

- The request stayed on n19w99.co.uk. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC.. [CLEAR](#)
- DNS for this domain is served by com., across 2 name servers. [NOTED](#)
- The registration is paid up to 2028-01-19. [CLEAR](#)
- The earliest public archive of this site is from 2018-08-10. [CLEAR](#)
- It is hosted on OVH, from a server in CA. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about n19w99.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
