Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is the corporate site of Na.Co. Audit S.r.l., an Italian professional-services firm presenting audit and assurance, accounting and corporate consultancy, financial advisory, and finance-function support for business clients. Its apparent business model is fee-based professional consulting and audit work, supported by company information, news content, contact details, and a contact form.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent corporate and professional-services profile, with no indications of phishing, brand impersonation, credential harvesting, crypto activity, or financial-product sales. Technical interaction testing noted four suspicious inline scripts, but this did not coincide with cloaking, hidden forms, wallet activity, password collection, or untrusted form destinations; the observed behavior therefore does not establish an impersonation or scam signal. Available external reputation checks found no malicious or suspicious detections, and no broker-related match was identified.

EVIDENCE

- The homepage and service pages describe Audit & Assurance, accounting and corporate consultancy, financial advisory, and finance-function support rather than consumer financial products.
- The homepage contained no login form or sensitive-data form; the single detected form was a contact form.
- The domain was registered in 2010 and is approximately 16.49 years old.
- Archive records contain 208 snapshots spanning 2021–2026, covering 6 tracked years.

Regulatory Verification Notes

The identity presented on the site is consistent with an Italian audit and advisory practice. The About, company-information, and contact content reportedly provide firm credentials, registration and VAT details, a Milan address, and telephone contact; however, the real-world operator connection remains independently unverified. The pages do not establish an independently verified professional licence or registration number for the specific services offered, so regulatory authorization should be confirmed where the engagement requires it. This is a verification point rather than evidence of misconduct. The site's limited SEO metadata and absence of structured data are presentation shortcomings, not identity contradictions.

EVIDENCE

- The homepage identifies “Na.Co. Audit | Società di revisione” and presents the firm as established by professionals with accounting, legal, and tax experience.
- The contact content lists Milan premises, a telephone number, and a company email address, while the site also presents registration and VAT information.
- The site is hosted on AS31034, ARUBA-ASN – Aruba S.p.A., Italy.
- Transport encryption uses a TLS certificate issued by Actalis Domain Validation Server CA G3, validation level DV, valid to 2026-12-20.

What to Verify Next

Before a formal engagement, independently confirm the firm's legal registration and any professional authorization applicable to the proposed audit or advisory work through the relevant Italian registry. Confirm the official contact channels through an independently obtained corporate source, and review the engagement letter, fee basis, liability terms, and payment-protection arrangements before sharing confidential business information or authorizing payment.

EVIDENCE

- The site provides dedicated About, Services, News, and Contact pages suitable for cross-checking the firm's stated activities and contact details.
- The site describes professional independence and qualifications as service commitments; those claims should be matched to the applicable professional register or engagement documentation.
- The contact form is presented as a general business-contact mechanism and is not configured as a credential or payment-collection form.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate professional-services website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, or other contradictory signal was identified, although the available evidence does not independently prove the real-world operator identity.

Infrastructure Integrity

The site has no detected CDN or WAF edge layer and resolves through two likely origin IP addresses, indicating a direct hosting posture. This is a neutral infrastructure characteristic and should not be treated as proof of legitimacy; it does, however, provide a clear and resolved hosting path for the website.

Closing Assessment

Normal browsing and business enquiry are proportionate, while credentials, confidential materials, and payments should follow the ordinary independent identity, engagement-term, and payment-protection checks appropriate to a professional-services relationship.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of nacoaudit.it.

- The request stayed on nacoaudit.it. It was not redirected to another domain. CLEAR
- Registration is published under Aruba s.p.a.. CLEAR
- DNS for this domain is served by arubadns.cz. NOTED
- The registration is paid up to 2027-02-27. NOTED
- The earliest public archive of this site is from 2021-12-18. CLEAR
- It is hosted on ARUBA-ASN, from a server in IT. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about nacoaudit.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
