Full analysis

Overview

NaPista is an online vehicle marketplace associated on-site with Banco BV, presenting searchable listings for cars, motorcycles, and heavy vehicles alongside FIPE price references, dealer-partner offers, financing simulations, and related purchase-support services.

Scam/Impersonation Risk

No contradictions were observed: the available evidence contains no phishing, impersonation, blacklist, or malicious-reputation finding. The homepage presents a coherent automotive marketplace rather than an unexplained credential-harvesting service, and observed behavior showed no hidden forms, wallet activity, cloaking, or externally posted password forms. The site's historical presence and clean external reputation are consistent with an established website, although they do not independently prove the real-world operator's identity.

EVIDENCE

- Domain registration record: created 2017-10-05; age 8.86 years; expiry 2034-10-05.
- Web archive: 144 snapshots from 2002-06-03 through 2026-07-20, spanning 25 years tracked.
- Homepage analysis recorded no red flags and no suspected brand impersonation.
- External reputation checks recorded 0 malicious and 0 suspicious results, with no blacklist finding.

Regulatory Verification Notes

The homepage provides clear institutional attribution to Banco BV and describes a marketplace and financing-lead model involving dealer partners. The supplied site evidence does not show a licensing authority or license number, so regulatory status for any financing-related activity should be confirmed independently; this is a disclosure and verification gap, not evidence of a scam. The real-world operator identity remains unverified despite the site's established presentation and supporting technical signals. No matching third-party broker warning was identified.

EVIDENCE

- Homepage title and content identify NaPista and state that vehicles can be bought and financed with BV.
- The homepage presents dealer listings, FIPE lookup functionality, and financing-simulation features.
- Hosted on AS396982, Google Cloud Platform — Google LLC, US.
- TLS certificate: GlobalSign RSA OV SSL CA 2018, OV validation, valid to 2026-09-30.

What to Verify Next

Before credential or payment interactions, independently confirm the stated Banco BV relationship and the applicable licensing or consumer-protection framework through an official registry or an independently sourced institutional channel. For a vehicle transaction, confirm the dealer's legal identity, vehicle documentation, return or cancellation terms, financing conditions, and available payment protections through channels not supplied solely by the website. Support and contact channels should likewise be confirmed through an independently sourced route.

EVIDENCE

- The homepage includes login/entry and financing-simulation interactions, making independent confirmation of the relevant service relationship appropriate before sensitive use.
- Behavioral testing recorded no hidden forms and no password forms submitted to external destinations.
- The site was classified from its page content as an established, low-risk ecommerce and automotive marketplace.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture with no observed scam or impersonation contradiction. The conclusion concerns the website's risk posture; it does not independently verify the real-world operator identity.

Infrastructure Integrity

The site resolves to a single likely origin hosted on Google Cloud Platform, with no CDN detected in the supplied infrastructure analysis. This is a conventional hosting arrangement that provides limited infrastructure reassurance, but hosting infrastructure alone is not proof of legitimacy.

Closing Assessment

Ordinary independent merchant-identity, contractual, and payment-protection checks should be completed before credentials or funds are committed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about napista.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
