- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

KT Nasmedia is an established corporate B2B digital marketing and advertising technology website presenting advertising services, ad platforms, ad technology, data management, analytics, research, consulting, AI solutions, investor relations, and recruitment information. Its apparent purpose is to support corporate marketing services and stakeholder engagement.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence. The homepage presents a coherent corporate identity and business model, with no phishing, malware, impersonation, cryptocurrency, wallet, or sensitive-form indicators. The domain also demonstrates long-term continuity consistent with an established operating presence.

- Domain registered in 2002 and approximately 24.19 years old.
- 498 archive snapshots spanning 2002–2026, covering 25 tracked years.
- The homepage identifies KT Nasmedia, its representative, Korean business address, telephone number, business registration details, privacy policies, and corporate disclosures.

Regulatory Verification Notes

The site provides substantial corporate and legal disclosure, including company information, governance materials, ESG and ethics content, investor-relations information, privacy policies, and a business registration number. No financial or other regulated-service license is claimed; this is a verification consideration for engagements that independently require regulated authorization, not an indication of deception. The available third-party broker context contains no matching warning.

- Hosted on AS4766, Korea Telecom, South Korea.
- Domain registrar: Inames Co., Ltd.
- TLS certificate issued by Sectigo Public Server Authentication CA OV R36, OV validation, valid through 2027-02-10.
- The homepage provides corporate, privacy, contact, investor-relations, and recruitment pages.

What to Verify Next

For any engagement requiring regulated authorization, confirm the applicable authorization directly with the relevant official registry and ensure that the contracting entity matches the disclosed corporate identity. For

consequential commercial arrangements, independently confirm contact and payment instructions through established corporate channels.

- The homepage contains a dedicated advertising-inquiry route and published corporate contact details.
- Corporate disclosures include governance, investor-relations, ethics, privacy, and recruitment sections.
- The site’s stated activities are conventional B2B advertising, data, analytics, research, consulting, and AI services.

Summary Verdict

The overall posture is that of a legitimate, established, trustworthy corporate website. Its identity, business purpose, disclosures, long operating history, technical controls, and clean reputation converge without contradiction.

Infrastructure Integrity

Hosting is confirmed on AS4766, Korea Telecom. The supplied infrastructure facts do not identify a trusted CDN or WAF layer, so protective edge infrastructure is not relied upon as a legitimacy indicator; this does not detract from the site’s established identity or clean risk posture.

Closing Assessment

Normal interaction, including account login and standard use, is appropriate. Conventional vendor and authorization checks remain suitable for consequential commercial engagements.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of nasmedia.co.kr.

- The request stayed on nasmedia.co.kr. It was not redirected to another domain. CLEAR

About this assessment

A trust score summarises the evidence TrustSniffer could collect about nasmedia.co.kr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
