Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

A French-language personal artist portfolio presents a simple welcome and navigation experience for showcasing paintings and facilitating prospective contact or commissions.

Scam/Impersonation Risk

Sensitive interaction risk is critical. The site's visible content is consistent with a small personal portfolio: it contains no login form, sensitive form, e-commerce flow, financial promise, cryptocurrency feature, or detected brand-impersonation indicator. However, that benign presentation is materially outweighed by confirmed external threat detections and blacklist status from multiple independent sources. The contradiction is therefore associated with the domain's external security reputation rather than with a visible financial or impersonation scheme on the captured page. Sensitive actions—including credential submission, account access, downloads, payments, or financial engagement—should not be undertaken on the basis of the page's appearance alone.

EVIDENCE

- The homepage is identified as a personal artist portfolio with no forms, no sensitive form, and no login interface.
- Independent external reputation checks recorded a confirmed blacklist hit and malicious detections attributed to Fortinet, Kaspersky, and Sophos.
- The domain was registered on 2008-07-08 and is approximately 18.13 years old.
- Archive records span 2009-09-02 through 2025-07-12, representing 17 years tracked.

Regulatory Verification Notes

The available page presents an individual artist description rather than a regulated financial-service proposition. No licensing claim or registration number is shown in the available site content; this is a transparency gap only and is not, by itself, evidence of fraud. The real-world identity behind the domain remains independently unverified, so the on-page presentation should not be treated as proof of operator identity. Registration uses Bluehost Inc. and a privacy service, which is an administrative characteristic rather than an identity contradiction. The page's limited content also provides little basis for assessing business terms, sales arrangements, or consumer protections if artwork is offered directly.

EVIDENCE

- The homepage title identifies the site as an artist website associated with "Nathalie Guenard" and "Nati" in Prévost.
- The available page content contains no licensing authority or license number.
- The domain registrar is Bluehost Inc.; the registration record expires on 2030-07-08.
- Hosting telemetry identifies AS46606, Unified Layer, US; the TLS certificate is issued by YR1 at DV validation level and is valid to 2026-10-24T19:11:04+00:00.

What to Verify Next

Any proposed purchase, commission, or transfer should be paused until the artist's identity, payment destination, delivery obligations, refund terms, and independent contact details are confirmed through an offline or otherwise trusted channel. If the site later presents regulated services or financial products, the relevant licensing claim should be checked directly with the applicable regulator rather than accepted from the website. Technical access should remain limited to passive viewing, with no credentials, payment details, downloads, or account creation.

EVIDENCE

- The homepage contains only a short welcome and navigation message and does not expose a transactional workflow.
- Behavioral testing recorded two successful runs with no external network activity, no wallet connection, no clipboard-writing behavior, and no hidden forms.
- The site provides no visible legal, licensing, or consumer-protection disclosure sufficient to validate a commercial engagement.

Summary Verdict

The website has a critical trust posture for sensitive interaction. Its benign personal-portfolio presentation does not reconcile the confirmed external threat and blacklist indicators, while the operator’s real-world identity is not independently verified. Passive viewing is the only proportionate permitted use reflected by the available evidence.

Infrastructure Integrity

The site resolves to Unified Layer infrastructure in the United States, with no CDN, WAF, edge-IP layer, or identified origin-candidate separation. A valid DV TLS certificate provides transport encryption, but the hosting arrangement offers no additional protective signal capable of offsetting the external reputation concerns.

EVIDENCE

- Infrastructure resolution identifies Unified Layer, US, on AS46606.
- No CDN or WAF was detected, and the infrastructure reported one resolved IP with no edge-IP layer.
- TLS validation is DV; issuer YR1; validity ends 2026-10-24T19:11:04+00:00.

Closing Assessment

Until the domain’s reputation and operator identity are independently resolved, prospective users should restrict activity to passive observation and avoid credential, download, payment, or other sensitive interactions.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

About this assessment

A trust score summarises the evidence TrustSniffer could collect about nathalieguenard.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
