- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is the corporate website of National Metal Packaging Limited, a Pakistan-based B2B manufacturer presenting aluminum bottle caps and closures, company history, manufacturing capabilities, product information, and contact or quotation options for pharmaceutical and food-sector customers.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent corporate-manufacturer model rather than a financial solicitation, with no detected login mechanism, sensitive-data form, wallet activity, deceptive redirects, or brand-impersonation indicators. Its stated business purpose, substantive company and product content, long-running domain registration, and available external checks are consistent with an established website; however, the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage and company pages identify National Metal Packaging Limited and describe the manufacture and supply of aluminum caps and closures to pharmaceutical and food companies.
- The domain was registered on 2013-02-15 and is approximately 13.52 years old.
- Historical records show 66 snapshots spanning 2013–2026, covering 14 tracked years, with no detected suspicious repurposing or semantic category change.
- Available external checks recorded no malicious or suspicious findings, no abuse reports, no blacklist or phishing hit, and no matched broker record.

Regulatory Verification Notes

The About content states that National Metal Packaging Limited was incorporated in November 1998 under section 32 of the Companies Ordinance 1984 and began operations in October 1999. This is an on-site corporate claim rather than independent proof of registration or operator identity. The supplied pages do not present a license number or independently verifiable regulatory authorization; for a manufacturing supplier, this is a disclosure point to validate according to the proposed contract, product standards, and jurisdiction. The site's quality and certification references should likewise be matched to current certificates and issuing bodies before reliance in regulated procurement.

EVIDENCE

- The About page states the incorporation date, statutory basis, commencement of operations, and relationships with pharmaceutical and food manufacturers.
- The site provides product, manufacturing-capability, and contact or quotation content but no supplied license number or regulatory authorization reference.
- Registered through HOSTINGER operations, UAB; the domain expiry is 2029-02-15.
- Served from AS47583, AS-HOSTINGER – Hostinger International Limited, CY, with Germany identified as the server country.

What to Verify Next

An interested counterparty should independently confirm the company's legal registration and operating address through the relevant Pakistani corporate or commercial registry, then validate the identity of the contracting entity through an independently sourced telephone number or business record. Any quality, safety, or industry certification relevant to pharmaceutical or food packaging should be checked with the named issuing organization, and quotation, delivery, warranty, returns, and payment-protection terms should be agreed in writing before funds or credentials are exchanged.

EVIDENCE

- The About page supplies the claimed corporate history that can be matched against an independent company registry.
- The Contact page provides the channel for an independently sourced identity cross-check.
- The Products and manufacturing pages identify the goods and capabilities against which certificates, samples, and contractual specifications can be validated.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate corporate website and supports a high-trust, low-risk posture for its stated B2B purpose. The assessment does not independently verify the real-world operator behind the site, so legitimacy should be understood as evidence-consistent rather than proven.

Infrastructure Integrity

The site resolves to Hostinger infrastructure on AS47583, with two likely origin IP addresses and no CDN detected. Its transport encryption uses a valid DV certificate issued by YE2, valid through 2026-10-04. This is a conventional technical posture and a modest mitigating signal, but hosting and TLS do not independently establish the operator's identity.

Closing Assessment

Normal business review may proceed, with independent merchant-identity, contractual, and payment-protection checks completed before credential submission or payment interaction.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of nationalmetalpackaging.com.

- The request stayed on nationalmetalpackaging.com. It was not redirected to another domain. CLEAR
- Registration is published under HOSTINGER operations, UAB. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2029-02-15. CLEAR
- The earliest public archive of this site is from 2013-07-03. CLEAR
- It is hosted on AS-HOSTINGER, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about nationalmetalphackaging.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
