

Is naturalsaltlamps.com safe? TrustSniffer's low-trust assessment: 25/100

naturalsaltlamps.com

Verdict

25

OUT OF 100

LOW TRUST

naturalsaltlamps.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

Saamia Impex is an established (since 1996) vertically integrated manufacturer and exporter of Himalayan pink salt products. The site markets product categories, certifications, OEM/private-label capabilities, shipping terms and factory details, and provides contact information and quote request options for B2B buyers.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What naturalsaltlamps.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Saamia Impex presents a corporate B2B website for a manufacturer and exporter of Himalayan salt products, offering product information, manufacturing and export services, certification claims, and quote-request functionality for commercial buyers.

Scam/Impersonation Risk

The site's visible content is coherent with a salt-manufacturing and export business and does not present login forms, financial services, cryptocurrency functions, or obvious phishing mechanics. However, external reputation evidence includes a confirmed blacklist result from two sources, with multiple malicious and suspicious detections, creating a material contradiction to the otherwise professional presentation. Abuse reports associated with the hosting IP are explicitly attributed to shared Google infrastructure, so they are not independently attributable to Saamia Impex; nevertheless, the confirmed blacklist status remains the decisive

risk signal. No conflicting legal-entity names or direct brand-impersonation indicators were observed, but the real-world operator identity remains unverified.

EVIDENCE

- The homepage identifies Saamia Impex as a Himalayan salt manufacturer and exporter and provides product, manufacturing, and quote-request content.
- External scanning recorded 4 malicious and 2 suspicious detections, and blacklist status was true across the evaluated sources.
- The hosting IP 34.111.179.208 has 68 abuse reports with a confidence score of 38; the reports are attributed to shared infrastructure operated by Google LLC.
- Domain registration records show registration on 2003-04-23, an age of 23.34 years, registrar TuringSign Inc. d/b/a Cosmotown, and expiry on 2027-04-23; archival records show 218 snapshots spanning 2003–2026 across 24 years.

Regulatory Verification Notes

The site describes Saamia Impex as founded in 1996 and claims direct access to the Khewra Salt Mine, vertically integrated manufacturing, supply to more than 50 countries, and compliance with FDA, GMP, HACCP, and ISO standards. Its business model is presented as wholesale export, OEM/private-label supply, and FOB/CIF/DDP shipment arrangements rather than a regulated financial service. The About, Certifications, Policies, and Contact content provides commercial context, but the supplied analysis does not establish an independently verified corporate operator, and no license or registration number is claimed or verified on the site. These are verification gaps rather than identity contradictions; the confirmed external blacklist signal should remain separate from the site's regulatory-disclosure assessment.

EVIDENCE

- The homepage states “Himalayan Salt Manufacturer & Exporter Since 1996” and claims supply to importers, brands, and distributors across 50+ countries.
- The Certifications and About content references FDA, GMP, HACCP, and ISO standards and describes mining, processing, crafting, grading, packing, and export operations.
- The site is hosted on AS396982, Google Cloud Platform — Google LLC, US.
- The site's TLS certificate is issued by YE1 at DV validation level and is valid to 2026-09-13T06:53:45+00:00.

What to Verify Next

Before any commercial engagement, independently confirm that Saamia Impex is a legally registered operating entity and validate each claimed certification with the relevant issuing body. Confirm the business address, factory relationship, export documentation, product specifications, shipping terms, and beneficiary details through an independent channel rather than relying solely on the website. Any quotation or payment arrangement should also be checked for consistency with independently obtained corporate records and established payment-protection controls.

EVIDENCE

- The About and Manufacturing pages make specific claims about factory operations, mine access, and vertical integration that can be checked against independent corporate and site records.
- The Certifications page identifies standards and certifications that require issuer-level validation.
- The Policies, shipping information, and quote-request content describe commercial terms requiring confirmation before a transaction.
- The Contact and quote-request pages provide the channels through which business identity and payment instructions should be independently corroborated.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. The professional B2B presentation and long operating history of the domain do not offset the confirmed external reputation contradiction, and the available evidence does not independently verify the real-world operator.

Infrastructure Integrity

The site resolves to a Google Cloud Platform address in the United States on AS396982, with one likely origin address and no detected CDN edge layer. Google Cloud provides established hosting infrastructure, but that infrastructure is a mitigating technical characteristic only and does not establish the legitimacy of the operator or override the external reputation findings.

Closing Assessment

Passive review may be used to understand the stated business offering, but account creation, credential submission, financial transactions, and release of sensitive commercial information should be deferred until the operator, certifications, and payment arrangements have been independently confirmed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 68 reports on hosting IP 34.111.179.208 (Google LLC, Content Delivery Network), 38% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of naturalsaltlamps.com.

- The request stayed on naturalsaltlamps.com. It was not redirected to another domain. CLEAR
- Registration is published under TuringSign Inc. d/b/a Cosmotown. CLEAR
- DNS for this domain is served by ideaservers.net, across 2 name servers. NOTED
- The registration is paid up to 2027-04-23. NOTED
- The earliest public archive of this site is from 2003-06-29. CLEAR
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about naturalsaltlamps.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
