

Is nb-ck.com legit? TrustSniffer's high-trust assessment: 90/100

nb-ck.com

Verdict

90

OUT OF 100

HIGH TRUST

nb-ck.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Chinese-language reseller site for NetEase enterprise email (网易企业邮箱) offering paid enterprise mail accounts, support contacts, phone number and company address in Ningbo. Contains marketing copy, pricing examples, FAQs and company registration/ICP info.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This Chinese-language website presents itself as a Ningbo-based reseller and service provider for NetEase enterprise email, offering paid business-mail subscriptions, support services, pricing information, trial access, telephone consultation, and company contact details for prospective corporate customers.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or conflicting-identity indicators were observed. The homepage has a coherent corporate-service presentation, provides business contact and address information, and the captured behavior showed no sensitive forms, hidden forms, wallet activity, suspicious scripts, cloaking, or external posting activity. The site's claims of "20 years" of email operations, recognition by "940 million users," and trust from more than "630,000 enterprises" are marketing assertions rather than independently established proof, but they do not by themselves create an impersonation finding.

EVIDENCE

- Domain registration record: created 2014-09-09; registered through Bizcn.com,Inc.; age 11.95 years.
- Historical record: 20 archive snapshots spanning 2018–2026, with 9 years tracked.
- Homepage behavior: no login form, hidden form, password-external form, wallet connection, clipboard hijacking, cloaking, or suspicious inline script detected.

Regulatory Verification Notes

The site identifies the business as Ningbo Changkua Information Technology Co., Ltd., describes itself as a NetEase enterprise-email service center, and publishes a Ningbo office address together with an ICP filing number. This supports a coherent apparent business identity, but the available evidence does not independently verify the operator's real-world connection to that entity or establish a separate regulatory authorization. For this type of enterprise-email resale activity, the principal verification issue is commercial authorization and contractual responsibility rather than a demonstrated financial-services license. The available external reputation signals do not show malicious or suspicious findings, while the absence of a broker-dataset match is contextual only and is not a licensing determination.

EVIDENCE

- Hosting: AS38365, Baidu - Beijing Baidu Netcom Science and Technology Co., Ltd., CN.
- TLS certificate: issuer YR1, domain validation (DV), valid to 2026-10-24T22:32:20+00:00.
- Site footer: lists “网易企业邮箱浙江服务中心：宁波畅快信息技术有限公司,” a Ningbo address, postal code 315000, and ICP filing 浙ICP备15015635号-1.
- Homepage content: presents enterprise-email pricing, a seven-day trial, FAQs, support information, and a corporate-service navigation structure.

What to Verify Next

Before a commercial engagement, independently confirm that the named Ningbo company is an authorized NetEase enterprise-email reseller and determine which entity will issue invoices, provide support, and bear contractual responsibility. The prospective customer should also review the applicable service terms, renewal and cancellation conditions, data-handling commitments, service-level terms, and payment protections through independently obtained contact channels. Any credential or payment interaction should occur only after those ordinary merchant-identity and transaction-protection checks are complete.

EVIDENCE

- Homepage: displays a paid subscription model with per-user pricing and a seven-day trial.
- About/contact content: provides a named corporate entity, physical address, telephone consultation route, and service-mail channel for independent comparison.
- Captured HTML: contains no sensitive submission form, so commercial and account-entry workflows should be assessed separately if reached through later navigation.

Summary Verdict

The overall posture is high-trust and low-risk, and the available evidence is consistent with an established, apparently legitimate business website. The operator's real-world identity and relationship to the represented service provider remain unverified, so the assessment supports ordinary consideration without treating identity as proven.

Infrastructure Integrity

The website is protected by a CDN/WAF arrangement, with observed edge infrastructure on AS16509 and hosting associated with Baidu on AS38365. This layered infrastructure and resolved hosting posture provide a mitigating security signal by reducing direct exposure, but infrastructure protection alone does not establish business legitimacy.

Closing Assessment

Proceed with normal business diligence, completing independent merchant-identity, contractual, and payment-protection checks before submitting credentials or making payment.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of nb-ck.com.

- The request stayed on nb-ck.com. It was not redirected to another domain. CLEAR
- Registration is published under Bizcn.com,Inc.. CLEAR
- DNS for this domain is served by dnspod.net, across 2 name servers. NOTED
- The registration is paid up to 2026-09-09. NOTED
- The earliest public archive of this site is from 2018-02-03. CLEAR
- It is hosted on Baidu, from a server in CN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about nb-ck.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
