

Is nbs.ng safe? TrustSniffer's low-trust assessment: 40/100

nbs.ng

Verdict

40

OUT OF 100

LOW TRUST

nbs.ng is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Website for Nungu Business School (NBS) describing programs (PGDs, executive education), admissions, scholarships, testimonials, contact details, and office address in Lagos, Nigeria. Emphasizes Islamic finance and ethical leadership.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website presents Nungu Business School as a Lagos-based educational institution offering postgraduate diploma programs, executive education, admissions services, scholarships, testimonials, research content, and student support. Its stated model is tuition- and fee-based education focused on business capability, Islamic finance, and ethical leadership.

Scam/Impersonation Risk

A confirmed blacklist hit creates a material security concern despite the site's coherent educational presentation and the absence of page-level indicators of brand impersonation or phishing. The homepage and associated institutional content describe ordinary academic services, but that benign content does not resolve the external reputation contradiction. Interaction telemetry also recorded password-entry forms and substantial page-structure changes after interaction; these are sensitive-interaction concerns, although they do not independently establish phishing. The appropriate posture is to treat login, credential submission, and financial activity as elevated-risk actions. No identity contradiction between multiple legal-entity names was observed.

EVIDENCE

- External reputation telemetry records a confirmed blacklist hit for the website.
- The homepage contains substantial school content, including programs, admissions, scholarships, testimonials, and contact information, with no listed page-level red flags.
- Browser interaction telemetry recorded 2 password forms and a maximum post-interaction DOM difference of 6162.
- The domain was registered on 2019-09-19 and is approximately 6.92 years old; the registrar is Upperlink Limited.

Regulatory Verification Notes

The site presents itself as Nungu Business School and publishes an office address in Lagos, admissions information, tuition-related material, and claims that its certifications are internationally recognized and accredited by leading global bodies. The supplied pages do not identify the accrediting bodies or provide a license or registration number, leaving the institution's legal and regulatory status unclear. This is a verification gap rather than, by itself, proof of fraud. Identity verification remains unconfirmed, and the confirmed blacklist signal should be considered separately from the site's educational business model. Transport and hosting controls are technically present, but they do not validate the institution's legal identity or accreditation claims.

EVIDENCE

- The homepage and academic pages identify the organization as Nungu Business School and describe postgraduate, executive, and online education.
- The site's certification statement refers to accreditation by "leading global bodies" without naming an authority or supplying a license number.
- The website is served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- The site's TLS certificate is issued by WE1, uses DV validation, and is valid to 2026-11-07 11:06:17 UTC.

What to Verify Next

Before enrollment, payment, or submission of personal information, the institution's accreditation claims should be checked directly with the named accrediting or educational authority, using contact details obtained independently of the website. The legal entity responsible for tuition contracts, refund terms, certificates, and student records should also be confirmed through official registration records. Contact channels should be validated through an independent route, and any payment process should provide ordinary purchaser protections and a clearly documented dispute or refund mechanism.

EVIDENCE

- The admissions and tuition pages create a direct payment and enrollment exposure.
- The certification and accreditation claims appear in the site's academic content but lack a named verifying authority.
- The contact page supplies an office location and telephone contact that can be compared with independently sourced institutional records.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interactions**. The site's substantial, internally coherent educational content is outweighed by the confirmed external reputation contradiction and unresolved identity assurance. Passive review may be possible, but the available evidence does not support treating the website as suitable for trusted credential or financial engagement.

Infrastructure Integrity

Cloudflare CDN and WAF protection provide a mitigating layer against direct exposure of the underlying service, while all observed addressing was associated with CDN edge infrastructure and the origin server was not observable. This arrangement improves perimeter resilience but also limits independent verification of the hosting origin, so it should not be treated as evidence of institutional legitimacy.

EVIDENCE

- Cloudflare CDN/WAF infrastructure was detected, with 4 observed edge IP addresses and 0 likely origin IP addresses.
- The observed edge infrastructure is registered to Cloudflare, Inc. in the United States.

Closing Assessment

The recommended course is to limit activity to passive review until independent institutional, accreditation, contact-channel, and payment-protection checks have been completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of nbs.ng.

- The request stayed on nbs.ng. It was not redirected to another domain. CLEAR
- Registration is published under Upperlink Limited. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-19. NOTED
- The earliest public archive of this site is from 2020-05-03. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about nbs.ng at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
