

Is ncservices.co.in safe? TrustSniffer's moderate-trust assessment:
70/100

ncservices.co.in

Verdict

70

OUT OF 100

MODERATE TRUST

ncservices.co.in is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Not Scam

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

NC SERVICES is an India-based IT and software development firm (founded 2017) offering enterprise deployments, managed NOC support, custom software, and a licensed SaaS product (NC Desk Pro). The site lists contact details, an office address in Gujarat, testimonials, and technology stack information.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What ncservices.co.in served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

NC SERVICES is an India-based corporate IT and software-development website presenting enterprise engineering, managed IT and network-operations support, custom software development, web engineering, design services, and its proprietary NC Desk Pro SaaS product; its apparent business model is professional-services engagements, support contracts, and software licensing.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence, including no confirmed phishing, impersonation, blacklist, or malicious-reputation finding. The homepage presents a coherent corporate-services profile with business capabilities, contact information, client-facing navigation, and a proprietary SaaS offering rather than an abuse-oriented or deceptive interaction model. An automated similarity signal associated the page with service.gov.uk, but the available analysis did not identify suspected impersonation or a conflicting identity; this is therefore treated as a limited similarity anomaly rather than evidence of fraud.

EVIDENCE

- The homepage identifies “NC SERVICES” and describes enterprise software engineering, managed IT support, web development, and NC Desk Pro.
- The homepage contains no sensitive form, hidden form, or untrusted submission destination, and the observed browser behavior showed no flagged activity.
- The domain registration record shows creation on 2023-12-05 and an age of 2.71 years; the registrar is HOSTINGER operations, UAB.
- External reputation checks recorded zero malicious and zero suspicious detections among evaluated sources, although coverage was partial.

Regulatory Verification Notes

The site's apparent identity is consistent with an IT-services provider operating under the name NC SERVICES, but independent real-world identity verification remains incomplete. The homepage states that the business was founded in 2017, gives an office address in Gujarat, India, and publishes telephone contact details, while also presenting testimonials, technology information, and enterprise deployment claims. The supplied content does not establish regulated status or provide a licensing authority and license number; for an ordinary IT and SaaS provider this is a transparency and applicability question rather than evidence of a scam. The domain record names NC SERVICES as the organization, and the technical controls provide ordinary transport security, but neither establishes the legal operator independently.

EVIDENCE

- The homepage identifies an India-based IT and software-development firm, gives a Gujarat office address, and publishes telephone contact details.
- The domain record lists NC SERVICES as the organization and HOSTINGER operations, UAB as registrar.
- The site is hosted on AS47583, identified as AS-HOSTINGER – Hostinger International Limited, CY.
- The site's TLS certificate uses DV validation, is issued by YE1, and is valid to 2026-11-01T20:40:08+00:00.

What to Verify Next

Before a procurement, support, or SaaS relationship becomes material, the business name, office presence, and contracting entity should be confirmed through an independent corporate or commercial registry appropriate to the jurisdiction. The homepage claims 150+ enterprise deployments, 24/7 technical NOC support, and an active premium SaaS license; those claims should be corroborated through named customer references, a formal proposal, or independently validated business contacts. If the proposed service involves a regulated activity or handling of regulated data, the applicable registry and authorization requirements should be checked separately before execution.

EVIDENCE

- The homepage makes the “150+ Enterprise Deployments” and “24/7 Technical NOC Support” claims.
- The homepage labels NC Desk Pro as “Premium License Active.”
- The homepage provides the business address and telephone details that can be compared with independently obtained corporate records.
- The site's navigation includes client-login functionality, making confirmation of the official access channel relevant before account use.

Summary Verdict

The website supports a **moderate-trust, not-scam posture**: its corporate presentation, coherent service model, registration record, transport security, and clean evaluated reputation are broadly consistent with an operating IT-services business. The available evidence does not independently prove the real-world operator's identity, so legitimacy should be regarded as apparent and evidence-consistent rather than conclusively established.

Infrastructure Integrity

The site resolves directly to hosting infrastructure associated with Hostinger rather than a detected CDN or WAF edge, with four likely origin addresses identified. This provides less intermediary shielding than a conventional edge-delivery arrangement, but it is an infrastructure characteristic and not, by itself, an indication of maliciousness.

EVIDENCE

- Hosting infrastructure is identified as AS47583, AS-HOSTINGER – Hostinger International Limited, CY, with country indication UA.
- Infrastructure analysis identified 4 unique IPs, 0 CDN edge IPs, and 4 likely origin IPs; no CDN was detected.

Closing Assessment

Prospective engagements should begin with independent confirmation of the contracting entity and service claims, while applying payment, access, and information-sharing controls proportionate to the value and sensitivity of the engagement.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ncservices.co.in.

- The request stayed on ncservices.co.in. It was not redirected to another domain. CLEAR
- Registration is published under HOSTINGER operations, UAB. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2026-12-05. NOTED
- The earliest public archive of this site is from 2020-10-25. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ncservices.co.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
