

Is neje.club a scam? TrustSniffer's high-risk assessment: 0/100

neje.club

Verdict

0

OUT OF 100

CRITICAL RISK

neje.club shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Official NEJE user community page offering event info, resources (wiki, blog, forum), and links to official shop and support channels. No forms or financial solicitations present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

NEJE.CLUB

NEJE User Club

A global space for NEJE users to join events,
exchange experience, and explore creativity with

What neje.club served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

NEJE Club is a community and support hub for users of NEJE laser products, presenting creator events, project showcases, setup resources, software and firmware guidance, tutorials, forums, and links to associated shop and support destinations; its apparent business model is informational community engagement that indirectly supports NEJE product sales and brand services.

Scam/Impersonation Risk

The site's homepage presents a coherent NEJE user-community purpose and contains no login form, financial solicitation, or obvious brand-impersonation indicators. However, this benign page presentation is materially outweighed by confirmed external threat detections: the domain received multiple malicious classifications and was identified on external blacklists. The available evidence therefore supports a **critical sensitive-interaction risk** despite the absence of a demonstrated legal-entity conflict or direct phishing form on the captured page.

The domain's established registration continuity and historical content presence provide provenance context, but they do not neutralize the active reputation contradiction.

EVIDENCE

- External reputation assessment recorded 11 malicious detections and confirmed blacklist hits from two external sources.
- The homepage is titled “NEJE Club – Global Creator Community” and describes events, a wiki, blog, forum, social channels, and project submissions.
- The domain was registered on 2017-04-19 and is approximately 9.34 years old.
- Web-archive records contain 102 snapshots spanning 2018–2026, with nine years tracked.

Regulatory Verification Notes

The homepage displays “© 2008–Now NEJE All Rights Reserved” and the identifier “粤ICP备17101336号,” but the supplied evidence does not independently verify the responsible legal entity, the scope of that identifier, or any authorization relevant to commercial activity. The site is not established in the supplied material as a regulated entity, and its apparent connection to the NEJE brand remains an indication rather than proof of operator identity. The domain is registered through Alibaba Cloud Computing Ltd. d/b/a HiChina, while the site’s transport certificate is domain-validated; these are infrastructure and registration facts, not evidence of licensing or regulatory approval.

EVIDENCE

- The homepage displays the copyright statement and the ICP identifier “粤ICP备17101336号.”
- The domain registrar is Alibaba Cloud Computing Ltd. d/b/a HiChina (www.net.cn).
- Hosting is identified as AS132203, TENCENT-NET-AP-CN - Tencent Building, Kejizhongyi Avenue, CN.
- The TLS certificate is issued by YR1 at DV validation level and is valid to 2026-11-04T05:37:44+00:00.

What to Verify Next

Before any sensitive interaction, an independent security review should determine why external reputation services classified the domain as malicious and whether the detections relate to the current site, its hosting environment, or linked destinations. The displayed ICP identifier and responsible operator should be checked against the relevant official registry, and the authenticity of the associated shop and support channels should be confirmed through an independently obtained NEJE contact route rather than relying solely on links from the site.

EVIDENCE

- Independent registry confirmation is required for the registration identifier displayed on the homepage.
- The homepage directs users to external shop, wiki, forum, YouTube, and Facebook destinations, making destination validation relevant before following those links.
- The site capture contained no sensitive forms, so any later request for credentials or payment details would represent a materially different interaction surface requiring separate assessment.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The site’s credible-looking community presentation and historical continuity do not overcome the confirmed external malicious and blacklist findings,

and the operator connection is not independently verified.

Infrastructure Integrity

The site resolves to a single apparent origin address, with no CDN edge IPs detected and no confirmed WAF layer identified in the supplied infrastructure evidence. This provides limited infrastructure mitigation and should not be treated as evidence of legitimacy.

EVIDENCE

- Infrastructure resolution identified one unique IP and one likely origin IP.
- CDN detection reported false, with zero edge IPs identified.
- The resolved infrastructure is located in Singapore.

Closing Assessment

Pending independent resolution of the external detections, activity should be limited to passive viewing; credentials should not be submitted and financial transactions should not be conducted through the site.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	76/100

Identity verification confidence	38%
----------------------------------	-----

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of neje.club.

- The request stayed on neje.club. It was not redirected to another domain. CLEAR
- Registration is published under Alibaba Cloud Computing Ltd. d/b/a HiChina (www.net.cn). CLEAR
- DNS for this domain is served by hichina.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-19. NOTED
- The earliest public archive of this site is from 2018-01-15. CLEAR
- It is hosted on TENCENT-NET-AP-CN, from a server in SG. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about neje.club at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
