

Is netcentrala.com safe? TrustSniffer's moderate-trust assessment: 50/100

netcentrala.com

Verdict

50

OUT OF 100

MODERATE TRUST

netcentrala.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

Japanese-language personal/professional blog 'HSP仕事CAFE' offering comprehensive articles for HSP readers about quitting jobs, choosing resignation agencies, side jobs, social insurance, and coping with workplace stress. Primary monetization appears to be display ads and possible affiliate links; content is editorial and advisory.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://netcentrala.com/

What netcentrala.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2005.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is a Japanese-language informational blog titled “HSP仕事CAFE,” presenting guidance for Highly Sensitive Persons on workplace stress, job selection, resignation procedures, side jobs, freelancing, and social-insurance matters. Its apparent business model is editorial content supported by advertising, affiliate links, and potentially sponsored material rather than direct payment or credential solicitation.

Scam/Impersonation Risk

The site’s visible content is consistent with a personal or professional advice blog: the homepage provides articles, an operator profile, resignation-agency comparisons, workplace guidance, and social-insurance explanations, while no login form, payment form, wallet connection, or explicit brand impersonation was observed. However, this benign presentation is outweighed by a material external reputation contradiction: the domain produced two malicious detections and is listed by two external sources as blacklisted. That does not establish that the editorial content itself is fraudulent, but it makes the domain unsuitable for assumption-based

trust and creates elevated risk for sensitive interaction. No identity contradiction, phishing form, or direct impersonation signal was observed in the supplied page findings.

EVIDENCE

- Homepage: presents “HSP仕事CAFE” as an advice blog covering HSP workplace issues, resignation agencies, side jobs, and social insurance; page-level analysis recorded no content red flags.
- Homepage behavior: no login form, hidden form, password submission, wallet connection, wallet-drainer activity, clipboard hijacking, or sensitive external form was detected.
- External reputation telemetry: 2 malicious detections were recorded, and the domain was marked blacklisted by 2 external sources.
- Domain history: registered 2004-02-28 and approximately 22.49 years old; 407 archive snapshots spanning 2005–2026, with 22 years tracked.

Regulatory Verification Notes

The site provides editorial and practical guidance, including comparisons of resignation-agency services and explanations of employment benefits, but the reviewed content does not claim a regulatory license or provide a license number. This is a transparency and verification matter rather than, by itself, evidence of a scam. The operator's real-world identity remains unverified, and the site should therefore be treated as an apparently informational publisher rather than an independently authenticated professional or regulated entity. The available infrastructure and transport signals are technically normal but do not resolve that identity uncertainty.

EVIDENCE

- Homepage and profile content: identifies the publication as being operated by a former HSP company employee with more than ten years of corporate work experience, but does not independently establish a legal entity.
- Site disclosure review: no regulatory authority, license claim, or license number was identified in the supplied pages.
- Domain registration: registrar recorded as GMO Internet Group, Inc. d/b/a Onamae.com; expiration recorded as 2027-02-28.
- Hosting and transport: served from AS13335, CLOUDFLARENET–Cloudflare, Inc., US; TLS certificate issued by WE1 at DV validation level, valid through 2026-10-22.

What to Verify Next

Before relying on advice with employment, resignation, benefits, or financial consequences, independently cross-check the relevant legal and administrative statements against current publications from the appropriate Japanese government authorities. Any resignation agency or commercial service promoted through the site should be assessed as a separate counterparty, including its legal name, service terms, refund position, and payment protections. The site's stated operator and official contact channels should also be confirmed through an independent route, and any affiliate or sponsored relationship should be distinguished from editorial recommendations.

EVIDENCE

- Resignation-agency comparison content: ranks services by price, reviews, and reputation, creating a need to validate each recommended provider independently.
- Social-insurance and benefits articles: discuss paid leave, retirement benefits, unemployment benefits, and related procedures that may require current official-source confirmation.
- Side-job content: includes advice on avoiding employer detection and handling resident-tax issues, areas where inaccurate or outdated guidance could have practical consequences.
- Contact and advertising navigation: the homepage includes “広告掲載・お問い合わせ,” indicating an advertising or commercial-contact pathway alongside the editorial content.

Summary Verdict

The overall posture is **moderate trust with elevated sensitive-interaction risk**. The site appears to function as an informational blog, but the external reputation contradiction and unverified operator identity prevent it from being treated as a sufficiently trusted basis for credentials, payments, or other consequential interactions.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and all observed addresses were Cloudflare edge addresses rather than an observable origin server. This reduces direct exposure of the hosting origin and is a mitigating technical control, but it is not evidence of legitimacy and does not eliminate the possibility of rapid content changes behind the edge layer.

Closing Assessment

Prospective users should restrict activity to read-only review, independently validate consequential recommendations through official or offline channels, and avoid submitting credentials or making payments through the site.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- A large share of what the page loaded came from other domains.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_MODERATE
- The structure of the page changed sharply while it was loading.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of netcentrala.com.

- The request stayed on netcentrala.com. It was not redirected to another domain. CLEAR
- Registration is published under GMO Internet Group, Inc. d/b/a Onamae.com. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-28. NOTED
- The earliest public archive of this site is from 2005-02-06. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about netcentrala.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
