## Full analysis

### Overview

The Netherlands and you is a government information and outreach portal representing the Kingdom of the Netherlands, presenting diplomatic news, country-specific resources, consular information, and guidance on travel, study, work, and living in the Netherlands.

### Scam/Impersonation Risk

No contradictions were observed. The homepage's government/public-service purpose, substantial informational content, absence of credential-harvesting forms, and lack of financial solicitation are consistent with a legitimate institutional portal. Historical records show continuity of the same government/public-service purpose rather than suspicious repurposing.

- The homepage identifies the Kingdom of the Netherlands and provides diplomatic, consular, travel, study, work, and living information.
- The homepage contains no login form, sensitive form, wallet connection, deposit request, or financial-product solicitation.
- Registered 2016 (~9.96 years old); 3,158 archive snapshots spanning 2017-06-03 to 2026-08-01, covering 10 years tracked.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing finding.

### Regulatory Verification Notes

The site presents itself as a publicly funded government information portal rather than a provider of regulated financial services. No financial licence or registration number is indicated in the supplied page evidence; this is a limited disclosure note, not an adverse legitimacy finding. The domain's registrar and certificate subject provide additional institutional alignment, while third-party broker intelligence produced no match.

- The homepage describes government and diplomatic information, including consular assistance and international partnerships, rather than selling products or soliciting deposits.
- The domain registrar is Rijksoverheid.
- Hosted on AS8075 (Microsoft Corporation, US).
- TLS certificate issued by DigiCert G2 TLS EU RSA4096 SHA384 2022 CA1, OV validation, valid to 2026-12-18.

What to Verify Next

For formal reliance, confirm any specific diplomatic, consular, or policy information against the relevant Netherlands government publication or official institutional channel before taking consequential action. Where correspondence or service access is involved, independently confirm the applicable contact route through an official directory or previously established institutional channel.

- The homepage provides country selection and consular-information pathways.
- The site links to established social platforms including Facebook, X, LinkedIn, and Bluesky.
- The portal's stated purpose is informational and public-service oriented.

Summary Verdict

The website has a high-trust posture and reads as a legitimate, established government information portal. Its identity, content purpose, historical continuity, technical controls, and clean external reputation converge without contradictory risk signals. Normal interaction, including account login where offered and standard use, is appropriate.

Infrastructure Integrity

The site is protected by a CDN/WAF, with the observed address served through Microsoft infrastructure and no origin candidate exposed in the analysis. This reduces direct origin exposure and is a mitigating infrastructure factor, although it is not by itself proof of legitimacy.

Closing Assessment

Standard browsing and ordinary use are appropriate; consequential governmental or consular decisions should remain subject to normal confirmation through official channels.

### About this assessment

A trust score summarises the evidence TrustSniffer could collect about netherlandsandyou.nl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
