

Is netherrealm.com legit? TrustSniffer's high-trust assessment: 100/100

netherrealm.com

Verdict

100

OUT OF 100

HIGH TRUST

netherrealm.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 75%.

What this site appears to be

Official-style corporate homepage for NetherRealm Studios, a Warner Bros.-affiliated video game developer associated with Mortal Kombat. It provides navigation to games, news, careers, community resources, FAQs, and detailed privacy controls.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2000.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the corporate and promotional presence of NetherRealm Studios, a Warner Bros.-affiliated video game developer associated with Mortal Kombat, presenting its games, studio news, career opportunities, community resources, FAQs, and consumer privacy controls.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or deceptive financial activity were observed. The studio identity displayed on the homepage is consistent with its Warner Bros. affiliation, while the domain's long registration history, extensive archival continuity, established global traffic footprint, and clean external threat reputation strongly support authenticity. Testing also found no credential-harvesting forms, cloaking, suspicious scripts, wallet interactions, clipboard manipulation, or untrusted data submissions.

- Domain registration records show registration through MarkMonitor Inc. on 3 November 1999, making the domain approximately 26.76 years old; registration extends to 3 November 2027.
- The web archive contains 5,000 snapshots spanning 15 April 2000 to 26 January 2024, representing 25 years of tracked history without detected repurposing or semantic drift.
- The homepage identifies NetherRealm Studios, Mortal Kombat, and associated marks as trademarks of Warner Bros. Entertainment Inc.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, no reported hosting-IP abuse, and an established global traffic rank of 39,790.

Regulatory Verification Notes

The observed business is a video game development studio rather than a financial, investment, or other activity for which the supplied evidence indicates a sector-specific licensing requirement. The homepage provides Terms of Use, a Privacy Policy, a Privacy Center, advertising choices, state-specific privacy information, and controls governing the sale, sharing, and targeted-advertising use of personal information. These disclosures establish a coherent consumer-governance framework, and no conflicting legal-entity names were found.

- The homepage footer attributes the relevant studio and franchise intellectual property to Warner Bros. Entertainment Inc. and displays the WB Shield notice.
- The homepage offers "Do Not Sell or Share My Personal Information," Global Privacy Control status, consent settings, and a U.S. State Supplement for applicable residents.
- The site is served from AS16509 (AMAZON-02 — Amazon.com, Inc., US).

- The site's transport encryption uses a DV certificate issued by Amazon RSA 2048 M01, valid until 29 December 2026.

What to Verify Next

For enterprise onboarding, ordinary counterparty due diligence may confirm the contracting Warner Bros. entity, applicable purchasing terms, and authorized commercial channels before executing a material agreement. Users making privacy-sensitive choices should review the available state supplement and configure the consent controls according to their jurisdiction and preferences.

- The careers, games, news, community, and FAQ navigation indicates separate visitor journeys whose applicable terms may differ by activity.
- The homepage presents granular advertising and personal-information preferences that can be reviewed before accepting default consent settings.
- No sensitive form, password form, hidden form, or form submission to an untrusted destination was detected on the assessed homepage.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong convergence among corporate identity, historical provenance, external reputation, technical security, and observed behavior. Normal interaction, including account login and standard use where offered, is appropriate.

Infrastructure Integrity

The site uses AWS CDN/WAF infrastructure, with both observed addresses operating as Amazon edge servers in the United States. The origin server was not exposed during analysis, which reduces direct-origin attack surface; this is a protective control and supporting mitigation, not independent proof of legitimacy.

Closing Assessment

Prospective users and organizations may engage with the website normally, applying routine privacy review and standard procurement controls where the interaction develops into a contractual relationship.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of netherrealm.com.

- The request stayed on netherrealm.com. It was not redirected to another domain. CLEAR
- Registration is published under MarkMonitor Inc.. CLEAR
- DNS for this domain is served by awsdns-17.org, across 4 name servers. NOTED
- The registration is paid up to 2027-11-03. CLEAR
- The earliest public archive of this site is from 2000-04-15. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about netherrealm.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
