## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

---

### Overview

NetHosted is an established UK web-hosting provider offering personal, business, reseller, email, and VPS hosting, supported by SSD infrastructure, managed applications, backups, a website builder, and UK-based technical assistance. Its recurring-service model advertises plans from £3.29 per month, a £1 trial, and a 30-day money-back guarantee.

### Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing behavior, or malicious reputation findings were observed. The domain's long operational history, substantial archival continuity, established traffic footprint, and clean external security reputation strongly support the conclusion that this is the authentic website of an established hosting business. Interactive testing found no credential forwarding, untrusted form destinations, cloaking, wallet activity, clipboard manipulation, or suspicious scripts.

- Domain records show registration on 18 March 2004 (~22.39 years old), with registration through NetHosted Ltd t/a NetHosted Limited and expiry on 18 March 2028.
- The domain has 568 archive snapshots spanning 22 May 2004–10 May 2026 (23 years tracked), with no detected suspicious repurposing or semantic drift.
- Reputation telemetry recorded zero malicious and zero suspicious classifications, no malicious safe-browsing result, no abuse reports, and no signature matches.
- The homepage displayed no sensitive login form or untrusted form destination; behavioral testing found no cloaking, suspicious inline scripts, external password forms, or brand impersonation.

### Regulatory Verification Notes

The homepage identifies NetHosted Ltd and publishes company and VAT registration numbers, while also linking visitors to terms, policy, contact, support, and service-status resources. This is a conventional commercial hosting business rather than a product category for which the supplied evidence establishes a sector-specific financial license requirement. The available company disclosures therefore provide coherent legal-identity context, with no conflicting entity names or adverse broker-reputation match.

- The homepage names NetHosted Ltd and presents company and VAT registration identifiers alongside links to legal and operational resources.
- The homepage links to terms, policies, contact information, support facilities, and a public service-status resource.

- The hosting infrastructure is served from AS29550 (SIMPLYTRANSIT – Team Blue Carrier Limited, GB).
- The site’s transport encryption uses a YR1-issued DV TLS certificate valid to 13 October 2026.

**What to Verify Next**

Institutional procurement should confirm the published company and VAT identifiers against the relevant UK registers, review the contractual allocation of responsibility for backups and service availability, and establish whether the refund commitment applies to the intended hosting plan. Enterprises should also confirm the official support and escalation channels before migrating production workloads.

- The homepage provides the corporate identifiers needed for an independent registry comparison.
- The advertised service includes backups and round-the-clock UK support, making retention scope, restoration procedures, and escalation terms relevant procurement checks.
- The site promotes a 30-day refund guarantee, providing a specific commitment to reconcile with the applicable contractual terms.
- Separate support, sales, status, terms, and policy resources are presented for operational and contractual due diligence.

**Summary Verdict**

The website is legitimate, established, and trustworthy. Its commercial identity, historical provenance, public-facing disclosures, reputation, and observed behavior converge consistently, with no contradictory risk signals. Normal interaction, including account login and standard use, is appropriate.

**Infrastructure Integrity**

The site resolves directly to a single likely origin address in Great Britain and does not use a detected CDN or WAF edge. This is a conventional, clearly attributable hosting posture; direct origin exposure offers less network-layer shielding than a CDN-fronted deployment, but the supplied evidence does not associate it with abuse or compromise.

**Closing Assessment**

Prospective customers may engage with the site normally, while organizations onboarding it as a material supplier should apply their standard vendor, contract, resilience, and data-protection review.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

**What the analysis found**

No rule findings contributed to this verdict.

**Identity verification**

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of nethosted.co.uk.

- The request stayed on nethosted.co.uk. It was not redirected to another domain. CLEAR
- Registration is published under NetHosted Ltd t/a NetHosted Limited [Tag = NETHOSTED]. CLEAR
- DNS for this domain is served by co.uk, across 4 name servers. NOTED
- The registration is paid up to 2028-03-18. CLEAR
- The earliest public archive of this site is from 2004-05-22. CLEAR
- It is hosted on SIMPLYTRANSIT, from a server in GB. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about nethosted.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
