

Is nethouse.ru legit? TrustSniffer's high-trust assessment: 90/100

nethouse.ru

Verdict

90
OUT OF 100

HIGH TRUST

nethouse.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Official-looking landing page for Nethouse, a Russian website-building SaaS offering free and paid plans, domain registration, e-commerce capabilities, analytics integration and partner programs. Contact/support addresses are present; the page contains login/signup actions and product marketing copy.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://nethouse.ru/

What nethouse.ru served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Nethouse.ru presents an established-looking Russian website-building SaaS platform offering a free entry option and paid services for creating and hosting websites, online stores, and landing pages, together with custom-domain registration, payment and analytics integrations, professional services, and partner programmes.

Scam/Impersonation Risk

No contradictions were observed across the supplied site content and external checks: there is no detected brand impersonation, phishing pattern, confirmed blacklist, or conflicting legal identity. The homepage contains ordinary login and registration functions, but the form analysis found no hidden forms, untrusted destinations, or sensitive-form anomalies. Behavioural testing did observe some non-whitelisted external requests and posts; these are operational network signals without accompanying cloaking, wallet activity, clipboard manipulation, or other abuse patterns, and they do not establish impersonation. One isolated external reputation detection was not corroborated by the broader checks, which showed no malicious Safe Browsing result, no blacklist result, and no abuse reports; it is therefore treated as an unconfirmed reputational signal rather than a contradiction.

EVIDENCE

- The homepage presents Nethouse-branded website-builder services and showed no brand-impersonation or phishing indicators.
- External reputation checks recorded `vt\_malicious: 1`, `gsb\_malicious: false`, `external\_blacklist: false`, and `abuseipdb\_reports: 0`; the isolated detection was marked unconfirmed.
- The homepage's two forms were identified as login, signup, and contact-request functions, with no hidden forms or untrusted destinations.
- The domain was registered in 2001 and is approximately 25.4 years old; registrar: NETHOUSE-RU.

Regulatory Verification Notes

The site provides a substantial service structure, including pricing, help, contact, user-agreement, agency-agreement, company, partner, and professional-service pages. The available material supports an established commercial SaaS presentation, but the real-world operator identity is not independently verified. The supplied pages do not show a licensing claim or registration number; for a website-builder service this is a disclosure and verification matter rather than evidence of a scam. Payment terms, contracting entity, and any applicable consumer or merchant protections should therefore be confirmed before commercial reliance.

EVIDENCE

- The site navigation exposes dedicated pricing, help, contacts, user-agreement, company, partner, and agency-agreement pages.
- The domain is served from AS43362, MAJORDOMO - Hosting Ltd, RU.
- The site's TLS certificate is issued by GlobalSign GCC R3 DV TLS CA 2020, uses Domain Validation (DV), and is valid to 2026-10-28.
- The site has a top-tier global traffic footprint, with an observed rank of 18137 and inclusion in the top 1 million domains.

What to Verify Next

Before credential or payment interactions, an independent check should connect the service to the contracting legal entity, confirm the applicable subscription and cancellation terms, review return or refund provisions where relevant, and establish the payment-protection mechanisms available for the intended transaction. Contact channels should be confirmed through an independently sourced route rather than relying solely on information encountered during the initial visit. If the engagement involves a regulated activity or a jurisdiction-specific licence requirement, the relevant public registry should be checked directly.

EVIDENCE

- The homepage provides login and signup actions alongside links to pricing, help, and contact resources.
- The site describes paid subscriptions, domain services, and professional services, making contractual and payment terms relevant to the proposed use.
- The supplied identity-verification status remains unverified despite the site's established commercial presentation.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. This conclusion supports ordinary business consideration, while not proving the identity of the real-world operator.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, with an observed edge server at 136.243.255.88 on AS24940 and additional potential origin candidates. This architecture provides a mitigating layer against direct exposure and service abuse, but infrastructure protection is not, by itself, proof of legitimacy.

Closing Assessment

The site is suitable for normal consideration, subject to ordinary independent checks of the contracting party, commercial terms, and payment protections before credentials or funds are committed.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of nethouse.ru.

- The request stayed on nethouse.ru. It was not redirected to another domain. CLEAR
- Registration is published under NETHOUSE-RU. CLEAR
- DNS for this domain is served by 110.64, across 2 name servers. NOTED
- The registration is paid up to 2027-04-02. NOTED
- It is hosted on MAJORDOMO, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about nethouse.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
