Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Net Vale is a regional Brazilian telecommunications website presenting recurring internet plans for residential, business, and rural customers in Minas Gerais, supplemented by dedicated connectivity, fixed telephony, VPN, mesh Wi-Fi, and physical-security solutions.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or other fraud signals were observed. The long-established domain, extensive historical record, clean external reputation, and benign browser behavior converge with the site's consistent corporate identity, making impersonation or scam activity unlikely.

- The domain's registration record identifies NET VALE LTDA as the owner and shows registration on 26 June 2008, making it approximately 18.12 years old.
- The web archive contains 148 snapshots spanning 30 August 2008 to 13 May 2026, covering 19 tracked years without evidence of suspicious repurposing.
- The homepage consistently identifies NETVALE LTDA-EPP, including CNPJ 09.460.884/0001-31, physical addresses, and telephone and WhatsApp contact routes.
- External threat-reputation checks recorded 0 malicious and 0 suspicious detections, no harmful-search classification, no abuse reports, and no signature matches; interactive testing found no cloaking, hidden forms, wallet abuse, clipboard hijacking, or suspicious scripts.

Regulatory Verification Notes

The homepage supplies a named legal entity and Brazilian corporate identifier, providing a concrete basis for entity verification. It states that equipment used for dedicated links is approved by Anatel, but this is an equipment-compliance claim rather than an explicit disclosure of Net Vale's own telecommunications authorization. No provider authorization or licence number is evident in the supplied page content; this is a limited disclosure matter, not evidence of illegitimacy.

- The homepage presents the legal identity NETVALE LTDA-EPP and CNPJ 09.460.884/0001-31 alongside multiple operating addresses.
- The dedicated-link description refers specifically to equipment approved by Anatel, without presenting an operator authorization number in the supplied content.
- The site's transport encryption uses a valid domain-validated certificate issued by YE2, valid until 8 September 2026.

- The homepage includes policy and support pathways appropriate to an established corporate service site.

What to Verify Next

Before entering a material service contract, institutional due diligence should confirm the published CNPJ in Brazil's official corporate registry, match the contracting entity and billing details to that record, confirm the applicable telecommunications authorization directly with Anatel, and validate the service address and official contact channels independently.

- The homepage provides a specific CNPJ and legal name suitable for authoritative registry matching.
- The site markets recurring connectivity services whose contracting entity, coverage commitments, service levels, and cancellation terms should correspond with the executed agreement.
- The homepage's Anatel-related wording provides a clear basis for distinguishing equipment approval from operator authorization.

Summary Verdict

Net Vale is a legitimate, established, and trustworthy corporate website. Its identity, historical continuity, reputation, and observed behavior converge without contradictory signals. Normal interaction, including customer-account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves directly to a likely origin address rather than operating behind a detected CDN or WAF. It is hosted on identified commercial infrastructure in Germany; this is a conventional hosting arrangement and is neither an independent guarantee of legitimacy nor a material adverse signal.

- The hosting infrastructure serves the site from AS47583, operated by AS-HOSTINGER — Hostinger International Limited, using IP address 82.112.246.95.
- Technical resolution identified one likely origin IP, with no CDN edge addresses detected.
- The hosting network is registered through RIPE NCC and geolocated to Germany.

Closing Assessment

Prospective customers may use the site normally and should apply standard procurement diligence when establishing a new contractual or payment relationship.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of netvale.psi.br.

- The request stayed on netvale.psi.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by 16.21 2804:101c:100::21, across 2 name servers. NOTED
- The registration is paid up to 2028-06-26. CLEAR
- The earliest public archive of this site is from 2008-08-30. CLEAR
- It is hosted on AS-HOSTINGER, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about netvale.psi.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
