

Is nevosoft.ru legit? TrustSniffer's high-trust assessment: 90/100

nevosoft.ru

Verdict

90

OUT OF 100

HIGH TRUST

nevosoft.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Russian-language gaming portal (Nevosoft) listing genres and downloadable games, offering user login/registration and promotional sales. Primarily informational/content with account features and paid/premium game editions.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Nevosoftware.ru is a Russian-language gaming and software-download portal presenting downloadable computer and mobile games across numerous genres, with user registration and login features, promotional sales, and premium or collector's editions. Its apparent business model is the distribution and sale of games and related content, supplemented by account-based user services.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, blacklist, or malicious-content indicators, and no conflicting legal identities were identified. The homepage presents a coherent gaming catalogue, ordinary account functions, and seasonal promotions rather than an implausible financial or investment proposition. Automated interaction did record external network activity and substantial page changes, but the same testing found no cloaking, hidden forms, wallet activity, clipboard manipulation, or password submission to external forms; these observations therefore do not outweigh the broader clean result. The site appears legitimate and low risk for its stated consumer-content purpose, while the real-world operator remains independently unverified. Evidence:

- The homepage lists game genres, named titles, downloadable editions, seasonal discounts, and standard login and registration functions.
- Page analysis identified zero red flags and no suspected brand impersonation.
- Browser testing completed 2 successful runs; it recorded 16 external XHR requests and 13 external POST requests, with 2 non-whitelisted XHRs and 2 non-whitelisted POSTs, but no hidden forms, cloaking, wallet-drainer activity, or clipboard hijacking.
- External reputation checks recorded 0 malicious findings and 0 suspicious findings; the site has a traffic rank of 19028 and is within the top 1 million.

Regulatory Verification Notes

The reviewed content is consistent with a consumer games portal rather than a regulated financial service. The homepage content does not present a license, registration number, or clearly evidenced legal-entity disclosure; this is a transparency item for merchant-identity and consumer-protection review, not evidence of a scam. Available infrastructure, registration continuity, and clean reputation signals support the assessment that this is an established, apparently legitimate website, but they do not independently prove the operator's real-world identity. Evidence:

- Technical registration evidence records creation on 2003-11-01 and an age of 22.81 years, with RU-CENTER-RU listed as registrar.
- The site is served on AS396982, Google Cloud Platform (Google LLC, US).
- Transport encryption uses a DV certificate issued by YR1, valid through 2026-10-20T07:29:39+00:00.
- The reviewed homepage presents games, account functions, and promotions but does not display a license number or regulated-service authorization.

What to Verify Next

Before credential or payment interactions, an independent check should connect the Nevosoft presentation to the responsible merchant or publisher, confirm the applicable purchase, refund, and support terms, and ensure that payment protection is available through the chosen payment method. Official support and contact channels should also be confirmed through an independent route, particularly for higher-value purchases or account-recovery requests. Evidence:

- The site's account workflow includes both login and registration, making independent confirmation of account-support procedures appropriate.
- The business model includes downloadable content, promotional sales, and premium editions, making refund and delivery terms relevant to any purchase decision.
- The available evidence supports an established site classification but does not independently verify the real-world operator identity.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradictions. The classification is strong for normal consumer browsing and ordinary site functionality, although it should not be treated as independent proof of the operator's identity.

Infrastructure Integrity

The site resolves directly to Google Cloud infrastructure without a detected CDN edge or WAF layer. This is ordinary, stable hosting and provides a mitigating infrastructure signal, but hosting architecture alone does not establish ownership or legitimacy. Evidence:

- Infrastructure resolution identified 1 unique IP and 0 CDN edge IPs, with 1 likely origin address.
- Hosting is provided by Google Cloud Platform in the United States on AS396982.
- The site's TLS certificate is DV-validated and issued by YR1.

Closing Assessment

Normal browsing is proportionate to the available evidence; independent merchant-identity, return-policy, and payment-protection checks should precede credential submission or purchases.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of nevosoft.ru.

- The request stayed on nevosoft.ru. It was not redirected to another domain. CLEAR
- Registration is published under RU-CENTER-RU. CLEAR
- DNS for this domain is served by 207.145, across 3 name servers. NOTED
- The registration is paid up to 2026-11-01. NOTED
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about nevosoft.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
