- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Newmarket Holidays is an established consumer travel-commerce website offering escorted tours, package holidays, and river cruises, with a business model based on bookings and related travel services.

Scam/Impersonation Risk

No identity contradictions, impersonation, phishing, malware, or other scam indicators were observed. The homepage consistently presents a conventional travel-booking proposition, with no investment returns, cryptocurrency promotions, concealed forms, or credential-harvesting behaviour. Its long-standing domain history, extensive archival continuity, established traffic presence, and clean external reputation strongly support the authenticity of the operation.

- The domain registration record shows registration on 19 February 2000, making the domain approximately 26.46 years old; registration is maintained through CSC Corporate Domains, Inc.
- The web archive contains 1,174 snapshots spanning 12 July 2001 to 25 June 2026, representing 26 years of tracked history, with no established suspicious repurposing or semantic drift.
- The homepage identifies the service as “Newmarket Holidays | Escorted Tours, Holidays and River Cruises” and contains substantial travel-related content consistent with that identity.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no phishing finding, no reported abuse, and placement within the top one million globally ranked domains.

Regulatory Verification Notes

The supplied homepage evidence does not establish a specific licensed or registered legal entity, and no independent regulatory status was identified. For a consumer travel business, any applicable financial-protection arrangements, corporate identity, booking protections, and jurisdiction-specific registrations should therefore be assessed through the relevant contractual and legal disclosures rather than inferred from general website legitimacy. This is a limited disclosure-verification point, not evidence of fraud or an identity conflict.

- The homepage presents a commercial travel agency and holiday-booking service, but the supplied page analysis does not establish a licensing or registration number.
- No matching broker record was identified in the supplied third-party broker-intelligence context; this has no bearing on travel-sector licensing.
- The domain is registered through CSC Corporate Domains, Inc., with the current registration term expiring on 19 February 2027.
- The site's transport encryption uses a WE1-issued domain-validated certificate, valid until 24 October 2026.

What to Verify Next

Before completing a material booking, the prospective customer should confirm the contracting entity, cancellation and refund terms, applicable package-travel protections, and payment-card dispute rights in the checkout documentation. Official contact channels should be confirmed independently when arranging complex or high-value travel, and visitors with stricter privacy requirements should review consent settings before accepting optional advertising or analytics technologies.

- The homepage's cookie inventory identifies 6 analytics integrations, 7 advertising networks, and 8 tracking pixels.
- Observed browser functions include consent management, behavioural analytics, call-tracking or callback functionality, embedded third-party media, and live-chat session storage.
- The inspected homepage contained no sensitive form, hidden form, externally submitted password form, or untrusted form destination.

Summary Verdict

The website is legitimate, established, and trustworthy, with mutually reinforcing identity, longevity, reputation, content, and technical-security signals and no observed contradictions. Normal interaction, including account login, booking activity, and standard use, is appropriate.

Infrastructure Integrity

The website is served from AS13335 (Cloudflare, Inc., US) and protected by Cloudflare's CDN/WAF. All four observed IPv4 and IPv6 addresses were Cloudflare edge servers, so the origin was shielded from direct exposure; this reduces infrastructure attack surface but is treated as a security control rather than independent proof of legitimacy.

Closing Assessment

Prospective customers may proceed with normal use while applying the routine contractual, payment, and privacy checks appropriate to online travel purchases.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of newmarketholidays.co.uk.

- The request stayed on newmarketholidays.co.uk. It was not redirected to another domain. CLEAR
- Registration is published under CSC Corporate Domains, Inc [Tag = CSC-CORP-DOMAINS]. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-19. NOTED
- The earliest public archive of this site is from 2001-07-12. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about newmarketholidays.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
