Key findings

- Automated classification: Not Scam.
- Domain age: 1 to 3 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This website is a Russian-language regional news portal focused on Dagestan, presenting a continuous feed of headlines, local announcements, incident reports, political and cultural coverage, and related public-interest material. Its apparent purpose is informational journalism, with likely monetization through advertising, sponsored content, partnerships, or local classifieds rather than financial transactions.

Scam/Impersonation Risk

No scam, phishing, impersonation, or identity-contradiction indicators were observed. The homepage contains substantial editorial content across regional news, incidents, politics, economy, sport, and culture; the supplied page analysis found no login form, sensitive data-collection form, hidden form, wallet interaction, cloaking, or suspicious script behavior. External reputation checks were clean, and the site's traffic footprint is established enough to support the conclusion that it presents as a genuine low-risk media website rather than a deceptive transaction platform. The real-world operator remains independently unverified, so the legitimacy assessment is evidence-consistent rather than proof of operator identity.

EVIDENCE

- The homepage is titled “Лента новостей Дарестана” and contains a substantial news feed with multiple regional subject areas; no red flags were recorded.
- The homepage behavior analysis confirmed zero login forms, zero hidden forms, zero password-external forms, zero wallet-provider detections, and zero clipboard-hijack detections across two successful runs.
- The domain registration record shows creation on 2025-02-12 and an age of 1.49 years.
- External reputation checks recorded zero malicious and zero suspicious detections, with the domain ranked 28451 and present in the top one million websites.

Regulatory Verification Notes

The site appears to operate as an editorial news publisher rather than a regulated financial or investment service. The supplied content does not establish an independently verified legal operator, and no licensing or registration number is presented in the available site material; for this type of publisher, that is a transparency item for ordinary due diligence rather than evidence of a scam. The absence of a matched broker-reputation record is contextual only and does not constitute a legal or regulatory determination.

EVIDENCE

- The homepage presents news, public-interest reporting, and regional editorial categories rather than financial products or transaction services.
- The available footer contains contact and standard site links, but the supplied evidence does not independently connect the website to a named real-world operator.
- The site is hosted on AS49352, LOGOL-AS – _Domain names registrar REG.RU_, Ltd, RU.
- Its TLS certificate is issued by YR1, uses Domain Validation (DV), and is valid to 2026-09-15T23:24:55+00:00.

What to Verify Next

Before any credential submission, commercial arrangement, sponsored-content engagement, or payment involving the publisher, an organization should confirm the operator's legal name and contact details through an independent channel and check that any applicable media, advertising, or corporate disclosures are consistent. If a payment or subscription is introduced, the counterparty should be assessed separately using protected payment methods, clear terms, and a documented refund or dispute process.

EVIDENCE

- The site's apparent business model is editorial publishing, so any request that departs from that model should receive additional scrutiny.
- The available contact and footer links provide a starting point for independently confirming the publisher's official communication channels.
- No financial, credential-collection, or wallet-connection workflow was observed in the supplied page and behavior evidence.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate regional news website. This conclusion supports ordinary browsing and routine interaction, while not independently proving the identity of the real-world operator.

Infrastructure Integrity

The site resolves through direct hosting rather than a detected CDN or WAF, with one identified origin address. This provides less evidence of edge-layer shielding than a mainstream CDN deployment, but the observed infrastructure was stable and no high-risk abuse pattern was detected.

Closing Assessment

Routine use is proportionate to the current assessment; any future credential, commercial, or payment interaction should follow ordinary independent counterparty and transaction-protection checks.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of news-dagestan.ru.

- The request stayed on news-dagestan.ru. It was not redirected to another domain. CLEAR
- Registration is published under REGRU-RU. CLEAR
- DNS for this domain is served by ru., across 2 name servers. NOTED
- The registration is paid up to 2027-02-12. NOTED
- It is hosted on LOGOL-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about news-dagestan.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
