

# Is news247.gr legit? TrustSniffer's high-trust assessment: 98/100

news247.gr

## Verdict

98

OUT OF 100

HIGH TRUST

news247.gr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

### WHAT THIS SITE APPEARS TO BE

Mainstream Greek news portal presenting headlines, topical sections (politics, economy, world, sports, culture), trending tags, multimedia (videos/podcasts) and social links. Cookie/consent banner and ad/analytics integrations present.

## Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

## Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

### Overview

News 24/7 is a Greek online news portal presenting current headlines and coverage across politics, Greece, world affairs, economy, sports, culture, health, weather, and multimedia such as videos and podcasts. Its apparent business model is a mainstream advertising- and content-partnership-supported media service, supplemented by social distribution and audience analytics.

### Scam/Impersonation Risk

No scam, phishing, impersonation, blacklist, or conflicting-identity contradictions were observed. The homepage presents coherent editorial content rather than a solicitation or credential-collection interface, and the available behavior evidence showed no login form, sensitive form, wallet activity, clipboard manipulation, cloaking, or password submission to external destinations. Some interaction telemetry recorded externally directed requests and substantial page changes after interaction; these are consistent with advertising, consent management, analytics, and multimedia functionality, and were not accompanied by a high-risk abuse pattern. The overall evidence therefore supports a low scam and impersonation risk posture.

#### EVIDENCE

- The homepage contains news sections, headlines, multimedia content, and social links, with no sensitive forms or login interface detected.
- The homepage analysis recorded no content red flags and no suspected brand impersonation.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with 0 abuse reports for the observed network address.

#### Regulatory Verification Notes

The site presents itself as a news and media publisher rather than as a financial, investment, or other regulated service, so no financial licensing claim is expected from the observed business model. The available identity linkage is supportive but not conclusive: the site links to established social platforms, while the real-world operator remains not independently verified. Its privacy banner provides substantive information about cookies, advertising, analytics, audience measurement, and data-processing choices; this is a useful privacy disclosure, although any publisher, subscription, or premium-content terms should be assessed separately if those services are used. The absence of a regulated-service claim is a transparency point for ordinary identity and commercial checks, not evidence of a scam.

#### EVIDENCE

- The homepage identifies the service as a news and online-media publication and describes advertising, analytics, and content-partnership activity.
- Hosting infrastructure was served from AS13335, provider CLOUDFLARENET - Cloudflare, Inc., US.
- The site's transport encryption used a DV certificate issued by WE1, valid to 2026-10-07.
- The homepage displayed a consent notice describing processing purposes, partner involvement, retention preferences, and withdrawal options.

#### What to Verify Next

Before credential or payment interactions connected with newsletters, subscriptions, or premium content, an independent check should confirm the publisher's legal identity, official social profiles, privacy terms, and any applicable consumer or payment-protection arrangements. If a commercial transaction is offered, the relevant checkout should be assessed for clear billing terms, cancellation rights, and a payment method with dispute protections. Official contact channels should be confirmed through independently established publisher profiles rather than relying solely on information encountered in an advertisement or embedded promotion.

#### EVIDENCE

- The homepage provides links to social profiles on Facebook, Instagram, X, YouTube, TikTok, and LinkedIn that can support independent identity comparison.
- The site's stated monetization is advertising and content partnerships, with possible newsletter or premium-content activity requiring ordinary commercial checks if activated.
- The homepage provides configurable privacy-consent controls that can be reviewed before continued browsing.

### Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No contradictory indicators were identified, although the available evidence does not independently prove the real-world operator’s identity.

### Infrastructure Integrity

The site is protected by Cloudflare’s CDN and WAF, and the observed addresses were CDN edge infrastructure rather than a directly exposed origin. This architecture is a mitigating security control that can reduce direct origin exposure, but it is not by itself proof of ownership or legitimacy.

### Closing Assessment

Normal browsing is proportionate to the assessed posture; before submitting credentials or making a payment, ordinary independent checks of publisher identity, commercial terms, and payment protections should be completed.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

### What the analysis found

No rule findings contributed to this verdict.

### Identity verification

|                                  |        |
|----------------------------------|--------|
| Status                           | LIKELY |
| Identity score                   | 80/100 |
| Identity verification confidence | 80%    |

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

### What TrustSniffer observed

First-party facts recorded during the assessment of news247.gr.

- The request stayed on news247.gr. It was not redirected to another domain. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

### Domain intelligence

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about news247.gr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
