Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

NewsBTC is an established cryptocurrency news and analysis website covering Bitcoin, Ethereum, altcoins, market trends, regulation, DeFi, Web3, and crypto prices. Its apparent business model is audience monetization through advertising, sponsored placements, and promotional editorial content rather than direct customer deposits or financial-product sales.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or conflicting-identity indicators were observed. The homepage presents a coherent news-media function, contains no sensitive login or payment form, and does not solicit deposits. Promotional crypto content, including a \$PEPENODE presale advertisement and passive-income messaging, creates ordinary advertising and investment-literacy considerations but does not establish deceptive solicitation.

- Homepage content identifies the site as a cryptocurrency news portal and lists Bitcoin, Ethereum, altcoin, DeFi, and regulation coverage.
- Page analysis found no phishing indicators, hidden forms, credential harvesting, or brand impersonation.
- The domain was registered in 2013 and is approximately 12.78 years old.

Regulatory Verification Notes

The site operates as a media and advertising publisher rather than a platform primarily offering regulated financial products. No licensing claim or registration number is evidenced in the supplied site content; this is a transparency point for any promotional material, not evidence of fraud. The available external reputation signals are clean, and no broker-dataset match was identified.

- Homepage business-model content describes advertising, sponsored placements, and audience monetization.
- The homepage includes promotional crypto presale advertising alongside editorial material.
- Reputation checks recorded no malicious or suspicious detections, and the site is within the global top one million by traffic.
- The domain registrar is NameCheap, Inc.; registration runs from 2013-10-22 to 2029-10-22.

What to Verify Next

For any sponsored token or investment promotion, independently confirm the advertiser, applicable jurisdictional disclosures, and the status of any claimed issuer or service through authoritative sources before relying on the

promotion. Official support and editorial-contact channels should also be confirmed through an independent route.

- Homepage advertising appears alongside editorial cryptocurrency reporting.
- The site covers investment commentary and crypto markets but does not primarily require deposits or direct product purchases.
- The supplied content contains no verified licensing claim for promotional offerings.

Summary Verdict

NewsBTC presents as a legitimate, established, trustworthy cryptocurrency media website with no observed contradiction between its identity, content, or operating model. Normal interaction, including account login where applicable and standard site use, is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with observed traffic served through an edge address and no origin candidate identified. This reduces direct origin exposure and is a mitigating infrastructure signal, but it is not independently proof of legitimacy.

- Hosted on AS2635, operated by AUTOMATTIC – Automattic, Inc., US.
- The observed edge IP is 192.0.66.182; the origin server was not observable.
- TLS is issued by YE1 using DV validation and is valid through 2026-09-17.

Closing Assessment

Standard browsing and account interaction may proceed normally; financial or promotional claims encountered on the site should be assessed separately on their own merits.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of newsbtc.com.

- The request stayed on newsbtc.com. It was not redirected to another domain. CLEAR
- Registration is published under NameCheap, Inc.. CLEAR

- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2029-10-22. CLEAR
- It is hosted on AUTOMATTIC, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about newsbtc.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
