Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

NEWSCAST is a Japanese news and press-release distribution portal presenting current corporate announcements across business, entertainment, sports, travel, technology, finance, and other categories, supported by publisher services, advertising, and related content distribution.

Scam/Impersonation Risk

No contradictions were observed across the available identity, content, behavioral, and reputation signals. The homepage presents a coherent news and press-release function, with no phishing indicators, brand impersonation, malicious detections, or deceptive financial mechanisms identified. Normal account login and standard interaction are appropriate.

- The homepage identifies NEWSCAST as a news, event-information, and press-release platform and provides categorized editorial content.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing result.
- The domain was registered on 2019-01-25 and is approximately 7.52 years old.

Regulatory Verification Notes

The site presents service information, legal policies, privacy information, contact options, and publisher-oriented commercial offerings. No regulated financial-service claim or license number is identified in the supplied evidence; this is a transparency point for any commercial engagement, not an indication of fraud. A related broker-reputation lookup produced no match.

- The homepage links to service information, legal policies, privacy information, contact options, Instagram, X, and RSS.
- Hosting is identified as AS16509 (AMAZON-02 — Amazon.com, Inc., US).
- The site's TLS certificate is issued by Amazon RSA 2048 M04, uses DV validation, and is valid through 2027-01-22.

What to Verify Next

For paid publishing or advertising arrangements, confirm the contracting entity, service scope, fees, and applicable terms through the site's official service and legal pages. Account holders should use the site's published contact and social channels when assistance is required, and counterparties should independently confirm any business relationship before signing material commitments.

- The homepage exposes account registration and login functions alongside service-information links.
- The site provides legal-policy and contact-page pathways relevant to commercial and account-related verification.
- The platform's stated business model is publisher services, business offerings, advertising, and content distribution.

Summary Verdict

NEWSCAST presents a legitimate, established, and trustworthy posture with coherent site purpose, clean reputation signals, stable operation, and no observed contradiction or impersonation evidence. The available evidence supports normal use, including account access and standard platform activity.

Infrastructure Integrity

The site is served through Amazon infrastructure with a valid, known-issuer DV certificate. This provides a sound transport and hosting baseline and is a mitigating infrastructure signal, although it is not independently proof of organizational legitimacy.

Closing Assessment

Normal interaction is appropriate, with ordinary contractual and account-management checks applied to any material commercial engagement.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of newscast.jp.

- The request stayed on newscast.jp. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-34.com, across 4 name servers. NOTED
- The registration is paid up to 2027-01-31. NOTED
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about newscast.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
