Full analysis

Overview

NewsGhana is an established Ghana-focused online news and media portal presenting breaking and ongoing coverage across politics, business, finance, sports, entertainment, health, technology, and world affairs. Its apparent business model is advertising-supported editorial publishing, supplemented by partnerships and ordinary account or newsletter features.

Scam/Impersonation Risk

No contradictions were observed across the site's identity, content, behavioral, and external-reputation signals. The homepage presents a coherent news-media model with substantial Ghanaian and African coverage, ordinary editorial categories, social-media links, and no detected impersonation, phishing, malware, or other high-risk abuse pattern. The domain is long established, and the site's observed behavior was stable, without cloaking, hidden forms, wallet activity, clipboard manipulation, or suspicious script activity. Normal interaction, including account login and standard site use, is consistent with the observed risk posture.

EVIDENCE

- The homepage identifies the service as "News Ghana" and provides structured sections for politics, business, finance, sports, entertainment, health, technology, and world news.
- Behavioral testing recorded successful stable runs with no cloaking, hidden forms, wallet-drainer activity, clipboard hijacking, or suspicious inline scripts.
- External reputation checks recorded no malicious or suspicious detections, no phishing indication, and no confirmed blacklist result.
- Domain registration: 2015-06-17; age 11.16 years; registrar: Ghana Dot Com.

Regulatory Verification Notes

The site operates as a media publisher rather than presenting itself as a financial, investment, or payment service. Its homepage links to About Us, Contact Us, Advertising, Partners, Terms of Use, Privacy Policy, and Cookie Policy pages, providing a recognizable disclosure framework. No license or registration number was identified on the examined pages; for this business model, that is a transparency point for ordinary corporate or contractual verification, not evidence of impersonation or fraud. Registration records identify Roger Agana and M'Ideas Limited, while the registrar is Ghana Dot Com.

EVIDENCE

- The homepage links to About Us, Contact Us, Advertising, Partners, Terms of Use, Privacy Policy, and Cookie Policy pages.
- No financial-services license, regulator, or registration number was presented on the examined site pages.
- Registration records list Roger Agana as owner and M'Ideas Limited as organization; registrar: Ghana Dot Com.
- TLS certificate: issuer WE1; validation level DV; valid to 2026-10-03T23:56:19+00:00.

What to Verify Next

For a commercial advertising, partnership, or content arrangement, the counterparty should confirm that the contracting entity matches the site's published identity details and applicable corporate records. The Terms of Use, Privacy Policy, and advertising information should be reviewed for the specific relationship, data handling, and payment obligations involved. Any formal regulatory requirement applicable to a proposed transaction should be checked with the relevant Ghanaian registry before execution.

EVIDENCE

- The site provides dedicated Terms of Use and Privacy Policy pages for review of contractual and data-handling provisions.
- The Advertising and Partners pathways identify the pages most relevant to commercial engagement.
- The About Us and Contact Us pathways provide the site's stated identity and communication channels for independent confirmation.

Summary Verdict

NewsGhana presents as a legitimate, established, and trustworthy online news publisher with a coherent business purpose and no observed contradiction or impersonation signal. The evidence supports normal interaction, including account login and standard use, with an overall high-confidence trust posture appropriate for its stated media function.

Infrastructure Integrity

The site is protected by Cloudflare's CDN/WAF infrastructure, with all observed addresses resolving to CDN edge servers rather than an exposed origin address. This materially mitigates direct infrastructure exposure, although protective hosting is treated as a supporting control rather than proof of editorial or corporate legitimacy.

EVIDENCE

- Hosted through AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- Four observed edge addresses were associated with AS13335: 104.21.15.2, 172.67.160.218, 2606:4700:3037::6815:f02, and 2606:4700:3037::ac43:a0da.
- CDN/WAF protection was identified as Cloudflare, with 4 edge IPs and 0 likely origin IPs observed.

Closing Assessment

Normal browsing, account login, newsletter use, and other standard interactions are appropriate; any prospective commercial engagement should follow the site's published terms and the organization's normal counterparty-validation process.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of newsghana.com.gh.

- The request stayed on newsghana.com.gh. It was not redirected to another domain. CLEAR
- Registration is published under Ghana Dot Com. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-16. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about newsghana.com.gh at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
