Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Russian general-interest digital news publication presenting recent reporting and informational articles on national affairs, society, economics, automotive topics, health, science, lifestyle, and gardening, with an apparent business model based on conventional media publishing and likely advertising or sponsored content.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or other scam indicators were observed. The domain's long operating history and extensive archival continuity materially support provenance, while current threat-intelligence checks report no malicious or suspicious classification. The homepage contains no login, payment, wallet-connect, or sensitive-data form, and observed browser behavior showed no cloaking, clipboard manipulation, hidden forms, or malicious scripts.

- The domain registration record shows registration on 22 August 2002, making the domain approximately 23.96 years old.
- The web archive records 5,000 snapshots from 1 October 2002 through 7 November 2025, spanning 24 tracked years, with no detected suspicious repurposing.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, no safe-browsing malicious finding, and no external threat-list hit.
- The homepage contained 0 forms and no detected brand-impersonation indicators, credential-harvesting behavior, or crypto-wallet functionality.

Regulatory Verification Notes

The publication provides a coherent media identity in its footer, naming its founder and editor-in-chief and citing a Roskomnadzor media registration dated 10 June 2022. It also publishes a Moscow street address, telephone number, and email contact, providing identifiable channels for editorial and administrative accountability. No conflicting legal-entity names were identified, and the absence of a broker-intelligence match has no material bearing on a general-interest news publisher.

- The homepage footer identifies the publication's founder and editor-in-chief and cites Roskomnadzor registration dated 10 June 2022.
- The homepage footer supplies a physical address in Moscow together with telephone and email contact channels.

- The domain is registered through REGRU-RU, with the current registration term expiring on 26 August 2026.
- The hosting infrastructure is served from AS197607 (TECHNOMEDIA-AS — Technomedia LLC, RU); transport encryption uses a valid DV TLS certificate issued by YE1 and valid until 23 October 2026.

What to Verify Next

For formal institutional onboarding, the cited media registration should be matched against the relevant official registry, and the named publisher and editorial leadership should be reconciled with current official records. Where content will support financial, medical, or other consequential decisions, individual articles should be assessed for authorship, sourcing, publication date, and separation of editorial material from commercial content. Official contact channels may also be confirmed through an independent directory or registry record.

- The supplied homepage text presents timely articles containing explicit publication dates across financial, health, automotive, and public-affairs subject areas.
- The captured page did not expose structured metadata or a meta description, making article-level byline and source review more important than reliance on search-preview metadata alone.
- No social-media domains were identified in the supplied page analysis, so independent institutional records provide the more suitable route for corroborating official communications.

Summary Verdict

The site is a legitimate, established, and trustworthy news publication. Its durable provenance, coherent editorial identity, clean external reputation, substantial readership footprint, and benign observed behavior converge on a high-confidence assessment suitable for normal interaction.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure. The observed address was an edge endpoint and no origin candidate was exposed, reducing direct-origin attack exposure; this is a useful security mitigation but is not treated independently as proof of legitimacy.

Closing Assessment

Normal browsing, account login if offered through the site’s standard interface, and ordinary use are appropriate, with routine institutional due diligence for formal onboarding or reliance on consequential editorial content.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of newsinfo.ru.

- The request stayed on newsinfo.ru. It was not redirected to another domain. CLEAR
- Registration is published under REGRU-RU. CLEAR
- DNS for this domain is served by com., across 2 name servers. NOTED
- The registration is paid up to 2026-08-26. NOTED
- The earliest public archive of this site is from 2002-10-01. CLEAR
- It is hosted on TECHNOMEDIA-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about newsinfo.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
