

Is nfts.co.uk legit? TrustSniffer's high-trust assessment: 100/100

nfts.co.uk

Verdict

100

OUT OF 100

HIGH TRUST

nfts.co.uk appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 75%.

What this site appears to be

Official-looking homepage for the UK's National Film and Television School, presenting creative-industry courses, campuses, facilities, student support, applications, alumni work, news, events, and fundraising initiatives. The page uses extensive analytics and advertising tracking but shows no substantive security or fraud indicators.

Evidence status and limitations

Evidence completeness: UNKNOWN

- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the online presence of the UK's National Film and Television School, presenting postgraduate degrees, diplomas, certificates, workshops and short courses alongside admissions, student support, campuses, production facilities, alumni work, industry events, partnerships and fundraising initiatives.

Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing activity or confirmed malicious reputation signals were observed. The site's extensive institutional content, long domain tenure, substantial historical record and established traffic footprint converge with clean external threat intelligence to support its legitimacy. Tested interactions showed no credential harvesting, untrusted form destinations, cloaking, wallet-related activity or clipboard manipulation.

- The homepage consistently identifies the institution as the National Film and Television School and provides detailed education, campus, facilities, student-support, alumni and application content.
- The domain registration record shows registration in 2000 (~26.45 years old) through GoDaddy.com, LLC, with expiry on 2027-02-23.
- The web archive contains 2,380 snapshots spanning 2007-07-12 to 2026-07-26 (20 years tracked), with no detected suspicious repurposing or established semantic drift.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, no search-browsing safety hit, no external threat-list hit, and a global traffic rank of 539,812.

Regulatory Verification Notes

The site presents an educational institution rather than a financial, investment or similarly regulated service, and it makes no licensing claim requiring validation within the supplied homepage evidence. The available analysis does not establish the completeness of corporate or statutory disclosures because no separate legal or governance page was assessed. No adverse broker-related match was identified; this is contextual reputation information rather than a regulatory determination.

- The homepage describes master's degrees, diplomas, certificates, workshops and short courses, supported by institutional partnerships, fundraising and public-support initiatives.
- The homepage's stated subject matter includes applications, scholarships and funding, UK campuses, accessibility services and creative-production facilities.
- The site's transport encryption uses a YE2-issued domain-validated TLS certificate, valid to 2026-10-13.

- The hosting infrastructure is served from AS396982 (Google Cloud Platform — Google LLC, US).

What to Verify Next

For institutional due diligence, the prospective counterparty should match the organisation’s legal name and payment instructions against independently obtained contracting documents, confirm admissions or fundraising requests through an established institutional channel, and review the applicable terms, privacy notice and refund or withdrawal conditions before committing funds. These are standard controls for an educational relationship rather than responses to a detected threat.

- The homepage presents applications, student funding and fundraising as distinct visitor journeys that may lead to financial or contractual commitments.
- The site discloses the use of Cookiebot, Google Analytics, HubSpot, Tidio and embedded media services, making the privacy and consent terms relevant to data-governance review.
- The homepage links to established social presences across Facebook, Instagram, LinkedIn, X/Twitter, Vimeo and YouTube, providing independent channels for institutional cross-checking.

Summary Verdict

The website is a legitimate, established and trustworthy institutional presence. Its identity, historical continuity, substantive educational content, clean reputation and technically sound operation converge without contradictory fraud or impersonation signals. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site uses a trusted CDN/WAF arrangement, while technical resolution identified both edge systems and potential origin candidates. This protective architecture reduces direct exposure and provides a meaningful operational safeguard, although infrastructure protection is not treated as independent proof of institutional legitimacy.

Closing Assessment

Prospective students, partners and donors may engage normally, applying routine contractual and payment-verification controls appropriate to educational transactions.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of nfts.co.uk.

- The request stayed on nfts.co.uk. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. [Tag = GODADDY]. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-23. NOTED
- The earliest public archive of this site is from 2007-07-12. CLEAR
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about nfts.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
