Full analysis

Overview

NGT is a Brazilian telecommunications provider serving Teresópolis, Rio de Janeiro, with consumer and business offerings spanning internet connectivity, television, communication, entertainment, customer support, and related subscription services.

Scam/Impersonation Risk

No contradictions were observed across the site's identity, content, behavioral, and reputation signals. The homepage presents a coherent telecommunications business, identifies New Group Telecomunicacoes LTDA ME, provides a physical address and telephone channels, and contains no phishing, deceptive financial, malware, or impersonation indicators. Normal interaction, including customer login and account actions, is appropriate.

- The homepage identifies NGT as a telecommunications provider and presents connectivity, television, communication, and entertainment services.
- The homepage displays a Teresópolis, Rio de Janeiro address, telephone support channels, and corporate identification.
- External reputation checks recorded zero malicious detections, zero suspicious detections, and zero abuse reports.
- The site's transport encryption is a valid DV certificate issued by YR2, expiring 2026-09-19.

Regulatory Verification Notes

The site provides institutional, regulatory, privacy, contact, and corporate-information areas and identifies its operating legal entity. No specific license number or regulator registration was stated in the supplied page content, so licensing remains a routine transparency item for independent confirmation rather than an indication of misconduct. The available third-party broker-context check produced no match.

- The homepage identifies "NEW GROUP TELECOMUNICACOES LTDA ME" and CNPJ 12.913.472/0001-14.
- The site links to institutional, regulatory, privacy, and contact sections.
- The domain was registered in 2018 and is scheduled to expire in 2030.
- The site is hosted on AS31898, Oracle Corporation, United States.

What to Verify Next

For regulated procurement or material commercial engagement, confirm the applicable telecommunications authorization and the company's current standing through the relevant Brazilian registry. Confirm customer-service and billing channels using independently sourced corporate contact information before executing unusual payment or account-recovery requests.

- The site provides a dedicated regulatory section for follow-up review.
- The site provides separate customer-area, sales, and contact pathways.
- The domain has 55 archive snapshots spanning 2001–2026, providing documented historical coverage.

Summary Verdict

NGT presents as a legitimate, established telecommunications business with a coherent operating model, identifiable corporate presence, clean external reputation, and no observed scam or impersonation contradictions. Its overall trust posture supports normal website use and routine account interaction.

Infrastructure Integrity

The site resolves directly to Oracle-hosted infrastructure on AS31898, with two likely origin addresses and no detected CDN or WAF layer. This is a conventional hosting arrangement and does not undermine the otherwise favorable assessment; the valid TLS deployment provides an important baseline transport-protection measure.

Closing Assessment

Standard customer, account, and subscription interactions are appropriate, with independent registry confirmation reserved for engagements requiring formal regulatory assurance or higher-value commitments.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ngt.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
