NICE & CLEAN OF SOUTH FLORIDA
RESTAURANT CLEANING

PROFESSIONAL

What niceandcleanofsouthflorida.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2023.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is a local commercial cleaning-service site for “Nice & Clean of South Florida,” presenting restaurant deep-cleaning services for kitchens, bathrooms, dining areas, and food-preparation spaces. Its apparent business model is to obtain one-time or recurring commercial cleaning contracts through telephone, email, physical-location, and quotation enquiries.

Scam/Impersonation Risk

The site’s presentation is consistent with a local cleaning business and contains no observed login form, payment workflow, cryptocurrency functionality, hidden form, external submission destination, or detected brand-impersonation pattern. However, this benign page content conflicts with confirmed external threat findings: the domain is blacklisted and four evaluated detections classified it as malicious. The associated abuse reports are materially discounted because they concern shared CDN infrastructure, with zero confidence and whitelisted status; that attribution does not remove the separate domain-level blacklist concern. No conflicting legal-entity names, direct impersonation finding, or phishing page behavior was observed in the supplied page analysis, but the real-world operator remains unverified.

EVIDENCE

- The homepage identifies “NICE & CLEAN OF SOUTH FLORIDA” and describes restaurant kitchen, bathroom, dining-area, and food-preparation cleaning services.
- External reputation evaluation recorded 4 malicious detections and a confirmed blacklist finding.
- The reported IP activity comprised 9 reports against shared CDN infrastructure, attributed to Vercel, Inc., with confidence score 0 and whitelisted status.
- Registration records list creation on 2026-05-05T18:38:17Z and an age of 0.29 years; the reconciled domain-age assessment records 2.9021218343600275 years, creating an unresolved provenance inconsistency.

Regulatory Verification Notes

The About, Services, Contact, and quotation-oriented pages make business claims including “licensed,” “insured,” “eco-friendly,” and “100% satisfaction,” and provide a West Park, Florida address and contact routes. The supplied material does not identify a licensing authority or license number, so those claims remain unverified rather than constituting evidence of fraud. The site is not independently connected to a verified real-world operator, and the absence of structured metadata is a minor supporting limitation. No matching third-party broker profile was identified, but that result is contextual only and is not a regulatory determination.

EVIDENCE

- The homepage and service content state “Fully Insured,” “Eco-Friendly Products,” and “100% Satisfaction,” while the FAQ asks whether the business is licensed and insured.
- The site's Contact content provides a physical address in West Park, Florida and commercial-service contact routes.
- The domain is registered through GoDaddy.com, LLC; the registration record names Domains By Proxy, LLC as the organization.
- The evaluated archive record lists first and last observation on 2023-09-25, while the archive evaluation records 2 snapshots across 1 year.

What to Verify Next

Before any contract, deposit, or transfer of sensitive business information, the prospective customer should independently confirm the operating entity, Florida business registration, applicable cleaning or commercial-service licensing, insurance coverage, and the authority of the person issuing a quotation. The physical address and telephone number should be validated through an independent offline or government source, and any payment request should be matched to the verified legal entity rather than relying solely on the website. Official support and contact channels should also be confirmed independently.

EVIDENCE

- The site's About and Contact pages provide the business name, West Park location, and service description to use for independent entity checks.
- The quotation call-to-action and commercial-contract model create a potential prepayment and business-information exposure before the operator is independently validated.
- The homepage's licensing and insurance claims do not include a licensing authority or license number in the supplied content.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interactions**. The website has a coherent local-service presentation and limited interactive attack surface, but the confirmed blacklist and malicious detections outweigh those positive content and behavioral indicators. Operator identity and legitimacy therefore remain unverified, and the site should not be treated as established solely because its pages appear professional.

Infrastructure Integrity

The site is delivered through Vercel's CDN/WAF infrastructure, with observed edge addresses hosted on AS16509, operated by Amazon.com, Inc. The edge-based deployment provides a mitigating layer against direct exposure of the underlying service, but shared protective infrastructure is not evidence that the business or domain operator is legitimate.

Closing Assessment

Treat the website as suitable for general informational review only until the business identity, licensing or insurance claims, and payment counterpart have been independently confirmed; sensitive credentials, confidential business information, deposits, and other financial commitments should not be provided during that interim.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

Signals weighed against the site

- AbuseIPDB: 9 reports on hosting IP 216.150.16.129 (Vercel, Inc, Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of niceandcleanofsouthflorida.com.

- The request stayed on niceandcleanofsouthflorida.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by vercel-dns.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-05. NOTED
- The earliest public archive of this site is from 2023-09-25. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about niceandcleanofsouthflorida.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
