

# Is niftytrader.in legit? TrustSniffer's high-trust assessment: 100/100

niftytrader.in

## Verdict

100

OUT OF 100

HIGH TRUST

niftytrader.in appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 65%.

What this site appears to be

NiftyTrader markets a paid analytics workspace for Indian options and F&O traders, offering live market data, option-chain analysis, screeners, alerts, strategy simulation, and historical backtesting. The page provides explicit subscription pricing, trial terms, support details, risk-related policy links, testimonials, and disclosures that preview values are illustrative; it does not promise guaranteed returns or request deposits for managed trading.

## Evidence status and limitations

## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

---

### Overview

NiftyTrader is an established subscription-based analytics platform for Indian options and futures traders, presenting market-data tools, research workflows, alerts, strategy modelling, and historical backtesting rather than custodial investment management or managed trading services.

### Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or malicious reputation findings were observed. The homepage's coverage of NIFTY, BANK NIFTY, FIN NIFTY, SENSEX, MCX, and crypto derivatives including BTC, ETH, and SOL is consistent with its stated analytics purpose. Although trading in these instruments carries inherent financial risk, the site distinguishes illustrative previews from live values, makes no guaranteed-return promise, and does not solicit deposits for managed trading. Its long operating history, substantial archival continuity, established traffic footprint, and clean external reputation support the conclusion that this is a legitimate service rather than a transient fraud operation.

- The homepage labels displayed product values as illustrative and does not offer guaranteed returns or managed-investment deposits.
- Interactive testing found no hidden forms, external password forms, wallet-provider requests, wallet-drainer behavior, clipboard hijacking, cloaking, or suspicious inline scripts.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, no reported abuse, and a global traffic rank of 77,353.
- The domain was registered in 2014 and is approximately 12.53 years old; 307 archive snapshots span 2014-03-06 to 2026-05-23, covering 13 tracked years with no gap exceeding one year.

### Regulatory Verification Notes

The site presents itself as a software and research provider, not as a broker, custodian, or direct investment manager. Its homepage supplies subscription pricing, paid-trial terms, support information, testimonials, and links to risk-related policies, providing meaningful commercial transparency. No regulatory licence or registration claim was identified in the supplied page content; given the stated analytics-only model, this is a matter of confirming the legal entity and the regulatory perimeter applicable to any broker-linked functionality, not evidence of deception. No conflicting legal-entity names or adverse broker-database match were identified.

- The homepage describes annual software subscriptions and a paid trial, alongside broker integrations and bundled third-party services.

- The supplied page content contains no licence authority or licence number and makes no claim that NiftyTrader holds client assets or manages investments.
- Domain registration is maintained through GoDaddy.com, LLC and is recorded through 2034-01-25.
- The site is served from AS16509 (Amazon.com, Inc.); its DV TLS certificate was issued by Amazon RSA 2048 M04 and is valid to 2026-12-04.

**What to Verify Next**

Institutional onboarding should confirm the contracting entity named on the checkout documentation, reconcile that entity with the applicable terms and billing records, and determine whether any promoted broker integration transfers users to an independently operated service. Subscription renewal conditions, trial conversion, cancellation procedures, data entitlements, and the methodology and limitations of backtesting should also be reviewed before procurement. Official support channels may be confirmed through an independent corporate route where contractual reliance is anticipated.

- The homepage expressly markets broker integrations and bundled third-party services, making provider-boundary review relevant to onboarding.
- The product page advertises seven years of backtest data, second-by-second option-chain refreshes, and coverage of more than 200 F&O stocks; these service specifications provide concrete points for contractual validation.
- The homepage provides explicit subscription and trial information together with policy and support references, enabling comparison against checkout and contract terms.

**Summary Verdict**

NiftyTrader has a high-trust posture and is assessed as a legitimate, established website. Its sustained provenance, clean security and reputation profile, coherent commercial model, and transparent product presentation converge without contradictory fraud indicators. Normal interaction, including account login and standard use, is appropriate.

**Infrastructure Integrity**

The website uses Amazon-hosted delivery infrastructure and valid transport encryption. This mainstream hosting posture reduces routine availability and transport-security concerns, although infrastructure quality is a mitigating control rather than independent proof of business legitimacy.

**Closing Assessment**

Prospective users may engage normally, subject to ordinary financial-services procurement, contractual, and trading-risk due diligence appropriate to the intended use.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

**What the analysis found**

No rule findings contributed to this verdict.

**Identity verification**

### About this assessment

A trust score summarises the evidence TrustSniffer could collect about niftytrader.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
