

Is nilsonszylit.com.br safe? TrustSniffer's low-trust assessment: 40/100

nilsonszylit.com.br

Verdict

40

OUT OF 100

LOW TRUST

nilsonszylit.com.br is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Website for Dr. Nilson Abrão Szylit, detailing medical specialties (fetal medicine, humanized birth, gynecological surgery), contact info, clinic locations (Itaim Bibi and Hospital Israelita Albert Einstein), and links to WhatsApp and Instagram.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What nilsonszylit.com.br served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is a physician and private medical-clinic profile for Dr. Nilson Abrão Szylit, presenting obstetrics, fetal medicine, humanized birth, gynecological surgery, consultation services, clinic locations, and contact routes through WhatsApp and Instagram.

Scam/Impersonation Risk

The website content is coherent with a medical practice and does not display a login form, payment workflow, financial solicitation, or apparent brand-impersonation mechanism. However, this benign presentation is outweighed by confirmed external reputation contradictions: the domain is blacklisted by two external sources, and threat-intelligence scanning produced multiple malicious detections. The site's apparent association with a named physician therefore does not establish that the online service is safe for sensitive interaction, and the real-world identity remains only likely rather than independently verified. No identity contradiction, phishing indicator, or impersonation signal was observed within the supplied page analysis.

EVIDENCE

- The homepage identifies Dr. Nilson Abrão Szylit and presents fetal medicine, humanized birth, and gynecological surgery services.
- External threat telemetry recorded 4 malicious detections and confirmed blacklist status across 2 sources.
- The domain was registered on 2019-07-05 and is approximately 7.13 years old.
- Historical records span 2021-12-18 through 2025-02-20, covering 5 years of tracked history.

Regulatory Verification Notes

The site presents a private medical practice operating through listed locations at Itaim Bibi and Hospital Israelita Albert Einstein, with consultations and surgical services as its apparent business model. The supplied pages do not claim a medical licence, registration number, or regulatory authority, leaving the practice's professional and corporate credentials unclear on-site; this is a verification gap rather than, by itself, evidence of fraud. The apparent physician identity should not be treated as independently proven, particularly in view of the external reputation contradictions. The available technical evidence confirms ordinary domain and transport infrastructure but does not establish medical authorization.

EVIDENCE

- The site's treatment and contact pages describe obstetrics, fetal medicine, humanized birth, and gynecological surgical services.
- Hosting resolves through AS47583, identified as AS-HOSTINGER – Hostinger International Limited, CY.
- The site uses a DV TLS certificate issued by YE1, valid through 2026-11-05T18:00:11+00:00.
- The supplied legal and identity content contains no stated licence number or named licensing authority.

What to Verify Next

Before any appointment deposit, disclosure of medical records, or other sensitive exchange, an independent check should confirm that the named physician and listed clinic locations correspond to the relevant official medical and facility registries. Contact details should be validated through an independently obtained clinic or hospital channel rather than relying solely on links presented by the website. Any request for identity documents, advance payment, or account credentials should be assessed against the independently confirmed provider and an appropriate payment-protection process.

EVIDENCE

- The contact page lists Itaim Bibi and Hospital Israelita Albert Einstein as clinic locations.
- The site provides WhatsApp and Instagram contact routes but no sensitive web form.
- The page analysis recorded 2 suspicious inline scripts, while also recording 0 external XHR requests and no hidden forms.
- The site's published business model is consultation and medical-service revenue rather than financial or cryptocurrency activity.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The website’s professional medical presentation is not sufficient to overcome the confirmed external reputation contradictions, and legitimacy remains apparent rather than proven. Sensitive engagement should therefore not be treated as ordinarily trustworthy on the supplied evidence.

Infrastructure Integrity

The site resolves directly through Hostinger infrastructure in Ukraine, with no CDN detected and four likely origin-IP candidates. The observed hosting arrangement provides limited protective separation between the website and its origin; valid transport encryption is a positive technical control, but it does not offset the external reputation findings.

Closing Assessment

Until the physician, clinic affiliations, regulatory standing, and contact routes are independently confirmed, engagement should remain limited to non-sensitive informational browsing, with credentials, medical documents, and payments withheld.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of nilsonszylit.com.br.

- The request stayed on nilsonszylit.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-05. NOTED
- The earliest public archive of this site is from 2021-12-18. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about nilsonszylit.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
