

Is nimo.tv legit? TrustSniffer's high-trust assessment: 90/100

nimo.tv

Verdict

nimo.tv appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not ScamLow Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 55%.

What this site appears to be

Landing page for a live streaming platform (NimoTV-style) listing channels, languages and navigation; contains signup/login links and standard legal pages in footer.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

## The page as captured

---

No screenshot is retained for this report.

## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

## Full analysis

---

### Overview

NimoTV is a multilingual, user-generated live-streaming and gaming platform that presents live channels, game content, community interaction, and “Go Live” functionality, with apparent monetization through advertising, virtual gifts, donations, subscriptions, or in-application purchases.

### Scam/Impersonation Risk

No contradictions were observed. The landing page consistently presents a live-streaming and social platform rather than a phishing page, financial scheme, or impersonation site; it contains channel listings, language options, signup and login navigation, and standard legal links. The available external reputation evidence records no malicious or suspicious detections, no phishing indication, no impersonation finding, and no blacklist hit. The platform’s user-generated-content and monetization model carries ordinary content, payment, and account-abuse considerations, but no site-specific fraud signal is present in the supplied evidence.

#### EVIDENCE

- The homepage identifies the service as “NimoTV-Top Game Lives community, Meet New & Chat Online” and displays live channels, games, languages, “Sign Up,” “Login,” and “Go Live” navigation.
- The homepage footer provides links to About Us, Contact Us, Cookie Policy, Privacy Policy, Copyright Policy, Terms, and Open Platform pages.
- The domain was registered on 2015-01-29 and is approximately 11.54 years old; the registrar is Alibaba Cloud Computing Ltd. d/b/a HiChina.
- External reputation checks recorded `vt\_malicious: 0`, `vt\_suspicious: 0`, `gsb\_malicious: false`, and `external\_blacklist: false`.

### Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate consumer streaming service, but the real-world operator identity is not independently verified. The homepage identifies the copyright holder as “Huya PTE. LTD.” and provides standard legal-policy navigation; however, no licensing claim, licensing authority, or license number is evidenced. That is a transparency and verification matter rather than an indication of scam or impersonation. A third-party broker dataset reported no match, which is contextual reputation information and not a licensing or regulatory determination.

#### EVIDENCE

- The homepage states “Copyright © 2018-2026 Huya PTE. LTD. All Rights Reserved.”
- The site's hosting infrastructure is identified as AS150436, BYTEPLUS-AS-AP – Byteplus Pte. Ltd., SG.
- The site's TLS certificate is OV-validated, issued by “GeoTrust G2 TLS CN RSA4096 SHA256 2022 CA1,” with validity through 2027-03-15.
- The certificate subject organization is recorded as “广州虎牙信息科技有限公司.”

#### What to Verify Next

Before credential or payment interactions, an independent check should connect the service to the intended commercial operator rather than relying solely on the site's own footer attribution. The terms, privacy, refund or purchase conditions, and any applicable virtual-goods or donation rules should be reviewed on the linked legal pages. Official support and contact channels should also be confirmed through an independently obtained route, and payment methods should provide appropriate transaction protections.

#### EVIDENCE

- The homepage links to Terms, Privacy Policy, Copyright Policy, About Us, and Contact Us pages that can be reviewed directly.
- The homepage presents signup and login navigation but no sensitive form was observed in the captured page.
- Behavioral testing recorded no hidden forms, no external password forms, no wallet connection activity, and no clipboard-write detection.

#### Summary Verdict

The website has a high-trust, low-risk posture and is apparently legitimate based on converging evidence of an established online presence, consistent service presentation, clean external reputation, and stable technical operation. The classification supports ordinary use, while the operator's real-world identity remains independently unverified and therefore should not be treated as proven.

#### Infrastructure Integrity

The site resolves to five likely origin addresses on AS150436 operated by Byteplus Pte. Ltd. in Singapore; no CDN vendor or edge-IP layer was detected. This provides a directly attributable hosting posture, although the absence of an identified CDN means the infrastructure does not rely on an additional edge-protection layer in the supplied evidence.

#### Closing Assessment

Normal browsing and platform use are proportionate to the assessed posture; credential or payment activity should proceed only after ordinary independent checks of operator identity, transaction terms, and available payment protections.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

#### What the analysis found

No rule findings contributed to this verdict.

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 25%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of nimo.tv.

- The request stayed on nimo.tv. It was not redirected to another domain. CLEAR
- Registration is published under Alibaba Cloud Computing Ltd. d/b/a HiChina (www.net.cn). CLEAR
- DNS for this domain is served by awsdns-59.net, across 4 name servers. NOTED
- The registration is paid up to 2027-01-29. NOTED
- It is hosted on BYTEPLUS-AS-AP, from a server in SG. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about nimo.tv at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
