

Is ninjahosting.cl legit? TrustSniffer's high-trust assessment: 90/100

ninjahosting.cl

Verdict

90

OUT OF 100

HIGH TRUST

ninjahosting.cl appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 70%.

What this site appears to be

NinjaHosting Chile — commercial landing page for an economical web hosting provider offering multiple annual plans, local datacenter in Santiago, cPanel, LiteSpeed/NVMe servers, free SSL, backups, migration and support. Page contains pricing, features, contact phone, and claims about tenure and customer base.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is a commercial Chilean web-hosting provider presenting annual hosting plans, domain registration, migration, backup, SSL, support, and affiliate services. Its apparent business model is subscription-based web infrastructure for individuals, freelancers, agencies, and small businesses, with pricing and service features displayed for prospective customers.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, malicious-reputation, or conflicting-identity indicators. The homepage describes a coherent hosting-service model with pricing, technical features, customer support, and Chilean service coverage rather than an implausible or unrelated offer. Automated observation did record externally directed network activity, including a non-whitelisted request pattern, but this was not accompanied by hidden forms, credential-exfiltration forms, wallet activity, cloaking, clipboard manipulation, or other abuse mechanisms; it is therefore a limited behavioral signal rather than evidence of impersonation or fraud.

EVIDENCE

- The homepage presents web-hosting plans, domain registration, migration, backups, SSL, support, and affiliate services; page analysis recorded no red flags.
- External reputation checks recorded zero malicious and zero suspicious detections, with no phishing or blacklist result.
- The domain was registered in 2014 and is approximately 12.19 years old; the registration record lists NIC Chile as registrar.
- Web archives contain 91 snapshots from 2015-02-04 through 2026-05-12, covering 12 tracked years.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate hosting business, but the real-world operator identity is not independently verified. The homepage provides a commercial service description, annual prices in Chilean pesos, contact and support references, and specific infrastructure claims, including LiteSpeed and NVMe servers, cPanel, daily backups, free SSL, migration assistance, and a 99.9% uptime guarantee. No regulated financial service is indicated, and no licensing or registration number is presented in the supplied page evidence; this is a transparency item for ordinary commercial due diligence, not evidence of a

scam. The registration record associates the domain with SERVICIOS COMPUTACIONALES HOSTING Ltda, while the site evidence does not independently establish that entity as the operator.

EVIDENCE

- The homepage lists annual plans from \$29,900 plus VAT, service features, support channels, and a 60-day guarantee.
- The domain registration record lists NIC Chile as registrar and SERVICIOS COMPUTACIONALES HOSTING Ltda as the recorded owner.
- The site is served from AS265839 (HOSTING.CL, CL); its TLS certificate is DV-validated, issued by YR2, and valid to 2026-10-01T09:12:41+00:00.

What to Verify Next

Before credential or payment interactions, an interested party should independently confirm that the named commercial entity operates the service, review the applicable terms, renewal conditions, cancellation and refund provisions, and confirm that the stated support and payment channels are official. For material purchases or hosted business services, payment methods with customer protection should be preferred and service guarantees should be confirmed in the governing terms.

EVIDENCE

- The homepage provides a sales contact, support entry point, and account-login entry point for independent channel confirmation.
- The homepage states annual billing, plan-specific resource allocations, migration support, backups, and a 60-day guarantee, creating concrete terms for comparison with the contractual documentation.
- The site links to Facebook and Instagram profiles that can be cross-checked against the commercial identity and service details.

Summary Verdict

The overall posture is high trust and low risk, supported by a sustained operating history, coherent commercial content, clean external reputation, and consistent technical evidence. The site is best characterized as an established, apparently legitimate service whose operator connection is likely but not independently proven.

Infrastructure Integrity

The site resolves directly to a single hosting address on HOSTING.CL infrastructure, with no detected CDN or WAF edge layer and one likely origin address. This provides less intermediary shielding than a CDN-backed deployment, but the infrastructure evidence is resolved and internally consistent; infrastructure alone is treated as a mitigating or limiting factor, not proof of legitimacy.

Closing Assessment

Normal evaluation is reasonable, with ordinary independent merchant-identity, contractual, and payment-protection checks completed before credentials or payment details are submitted.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ninjahosting.cl.

- The request stayed on ninjahosting.cl. It was not redirected to another domain. CLEAR
- Registration is published under NIC Chile. CLEAR
- DNS for this domain is served by 104.37), across 2 name servers. NOTED
- The registration is paid up to 2033-06-06. CLEAR
- The earliest public archive of this site is from 2015-02-04. CLEAR
- It is hosted on AS265839, from a server in CL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ninjahosting.cl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
