Key findings

- Automated classification: Governance Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2004.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Nirmal Packaging Industries presents a corporate manufacturer and supplier website for corrugated boxes, rolls, and sheets, with product information, quality-assurance capabilities, company contact details, and enquiry options oriented toward wholesale and business purchasing.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, blacklist, malicious-content, or suspicious business-model indicators. The homepage describes ordinary packaging products and manufacturing capabilities, including corrugated boxes, rolls, sheets, testing equipment, and enquiry-based contact rather than credential collection or financial transactions. The site contains no login form, no sensitive form, no cryptocurrency functionality, and no detected hidden or externally directed password forms. Its historical web presence provides supporting provenance, although historical records alone do not independently establish the current real-world operator.

EVIDENCE

- The homepage identifies Nirmal Packaging Industries and describes corrugated boxes, corrugated rolls, sheets, manufacturing equipment, and quality-testing facilities.
- The homepage contains one contact/enquiry form and no login or sensitive-data form.
- The domain was registered on 2024-03-10 and is approximately 2.45 years old.
- The web archive records 311 snapshots spanning 2004–2026, covering 23 tracked years.

Regulatory Verification Notes

The website appears to operate as a packaging manufacturer and supplier rather than a business presenting regulated financial or investment services. No licensing claim or license number is identified in the reviewed corporate content; for this business model, that is a transparency and commercial-verification point rather than evidence of a scam. The available evidence is consistent with an established-looking business website, but the real-world operator identity remains independently unverified. External reputation checks found no malicious or suspicious detections in the evaluated results, while coverage was partial; this should be treated as supporting context, not a regulatory finding.

EVIDENCE

- The site's transport encryption uses a DV certificate issued by YR1, valid through 2026-10-14.
- The site is hosted on AS46606, Unified Layer, US.
- The domain registrar is GoDaddy.com, LLC, with registration extending to 2029-03-10.
- The reviewed homepage provides business descriptions, addresses, telephone numbers, and enquiry channels but no identified license or registration number.

What to Verify Next

Before a material commercial order, independently confirm the supplier's legal name, operating address, telephone details, product specifications, delivery commitments, and return or dispute terms through an offline or independently sourced channel. Payment should use an arrangement offering documented commercial recourse, and any bank-account or beneficiary change should be validated through a separately trusted contact route. The absence of a clear licensing or registration reference should be resolved through the relevant business registry where such registration is expected.

EVIDENCE

- The homepage provides the business name, Noida location, telephone contact, and product scope needed for independent counterparty checks.
- The enquiry workflow supports obtaining written quotations, specifications, delivery terms, and payment instructions before commitment.
- The reviewed content does not show an account-login workflow, reducing the need for credential-based interaction.

Summary Verdict

The overall posture is moderate trust. The site presents a coherent, low-risk commercial purpose and no observed scam or impersonation contradictions, while independent confirmation of the operating entity is still incomplete. Normal browsing and routine enquiries are reasonable, with stronger controls appropriate for sensitive or high-value commercial activity.

Infrastructure Integrity

The site resolves to a directly hosted Unified Layer environment in the United States, identified as AS46606, with no CDN detected. This is a conventional hosting arrangement, but it provides less edge-layer filtering and origin shielding than a CDN-backed deployment; infrastructure therefore offers limited mitigation and is not, by itself, evidence of legitimacy.

EVIDENCE

- Hosting provider: Unified Layer, US; ASN: AS46606.
- Resolved server IP: 204.11.59.105; unique resolved IP count: 1.
- TLS validation level: DV; issuer: YR1; certificate valid to 2026-10-14.

Closing Assessment

Prospective counterparties should use documented commercial controls, independently confirm the counterparty and fulfillment terms, and limit initial exposure until the transaction relationship has been established.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Dynamic Interaction Caution

- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.

Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION

Identity verification

Status

UNVERIFIED

Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of nirmalpackaging.com.

- The request stayed on nirmalpackaging.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by webhostbox.net, across 2 name servers. NOTED
- The registration is paid up to 2029-03-10. CLEAR
- The earliest public archive of this site is from 2004-11-05. CLEAR
- It is hosted on UNIFIEDLAYER-AS-1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about nirmalpackaging.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
