OUT OF 100

CRITICAL RISK

no3oma.net shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Very short German-language placeholder mentioning 'no3oma' — appears to be a parked or minimal informational page with no active features or monetization.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What no3oma.net served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a very short German-language placeholder page for “no3oma,” presenting only minimal informational text and no identifiable active service, transaction flow, or clear business model; its apparent function is a parked or inactive domain page.

Scam/Impersonation Risk

No conflicting legal identities or brand-impersonation indicators were observed. However, the domain has a confirmed blacklist hit and multiple external threat detections, creating a direct contradiction to ordinary trust expectations and supporting a critical risk posture for sensitive interaction. A separate signal records abuse reports against the shared hosting-provider IP; because that signal is attributed to shared infrastructure, it is contextual rather than conclusive domain-specific attribution, but it does not offset the independent blacklist findings.

EVIDENCE

- External reputation assessment: blacklist status confirmed, with 8 malicious detections recorded.
- Hosting-IP reputation: 7 abuse reports associated with shared provider infrastructure, rather than uniquely attributed to the domain.
- Domain registration record: registered 2018-07-15 and approximately 8.1 years old.

Regulatory Verification Notes

The available page does not identify an operating company, regulated entity, license, registration number, or responsible jurisdiction. This is a material verification gap for any service that might later solicit accounts, payments, investments, or other sensitive activity; it is not, by itself, proof of a scam. The operator's real-world identity remains unverified, and the page's extremely limited content provides no substantive basis for establishing legal accountability.

EVIDENCE

- Homepage: 48 characters of visible text, limited to "no3oma.net - Informationen zum Thema no3oma."
- Homepage: no license claim, licensing authority, or license number is presented.
- Registration record: registrar identified as Name.com, Inc.; expiry recorded as 2027-07-15.

What to Verify Next

Before any non-passive interaction, an independent source should establish the operator's legal name, jurisdiction, and any licensing requirement applicable to the proposed activity. Official contact channels should be confirmed through an independent route, and any future account, payment, or financial workflow should be assessed only after the operator and service purpose are corroborated through authoritative records. The absence of an active service flow means there is currently no legitimate transaction process available to validate.

EVIDENCE

- Homepage: no login form, sensitive form, or wallet-connection execution was observed.
- Browser testing: 6 external XHR requests and 4 external POST requests were recorded.
- Browser testing: 4 console errors were recorded across 2 successful runs.

Summary Verdict

The overall posture is critical, with the available evidence unsuitable for treating the site as a trusted destination for sensitive interaction. Its apparent identity and purpose remain unverified, and the external contradiction is sufficiently material that the site should not be considered an established legitimate service.

Infrastructure Integrity

The site resolves directly to hosting infrastructure without a detected CDN or WAF layer. This provides limited protective context and should not be interpreted as evidence of legitimacy; the transport certificate is a baseline security control only.

EVIDENCE

- Hosting: served from AS47846, SEDO-AS - SEDO GmbH, DE.
- TLS: Encryption Everywhere DV TLS CA - G2, domain validation (DV), valid to 2026-10-13 23:59:59 UTC.
- Network posture: 1 unique IP, 0 edge IPs, and 1 likely origin IP; no CDN detected.

Closing Assessment

Prospective users should restrict activity to passive viewing until the operator and intended service are independently authenticated; credentials, account creation, and financial activity should not be attempted.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 7 reports on hosting IP 91.195.240.94 (Sedo Domain Parking, Data Center/Web Hosting/Transit), 14% confidence. The reports are attributed to shared infrastructure, not specifically to this

website.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about no3oma.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
