

Is nocutnews.co.kr legit? TrustSniffer's high-trust assessment: 100/100

nocutnews.co.kr

Verdict

100

OUT OF 100

HIGH TRUST

nocutnews.co.kr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not ScamLow Risk

Assessed 2026-08-04 by automated analysis. Classification confidence 75%.

What this site appears to be

Homepage of 노컷뉴스 (No Cut News), a Korean CBS-affiliated general-news publication covering politics, society, policy, economics, industry, international affairs, entertainment, sports, opinion, regional reporting, photos, podcasts, and video. The footer provides a corporate address, telephone number, business registration, newspaper registrations, publication dates, responsible editors, policies, and copyright notices.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the Korean CBS-affiliated No Cut News portal, presenting general and regional journalism across politics, society, economics, international affairs, entertainment, sports, opinion, photography, podcasts, and video, with a business model encompassing publishing, subscriptions, advertising, partnerships, and content licensing.

Scam/Impersonation Risk

No phishing, impersonation, conflicting legal identity, or other contradictory signal was observed. The domain has a long-established, historically consistent news-media identity, while independent threat telemetry records neither malicious classifications nor reported abuse. This convergence strongly supports the site's authenticity.

- Domain-registration records identify CBSi as the owner and Inames Co., Ltd. as registrar; registered 24 July 2003 (~23.05 years old), with expiry on 24 July 2030.
- Historical records contain 5,000 archive snapshots spanning 2 January 2011–20 November 2021 (11 years tracked), with no detected repurposing or material change from the news/media category.
- External reputation telemetry records 0 malicious and 0 suspicious classifications, no harmful-site detection, 0 abuse reports, and no signature matches.
- Homepage analysis found no login form, hidden form, brand-impersonation indicator, suspicious script, cloaking, clipboard manipulation, or cryptocurrency-wallet behavior.

Regulatory Verification Notes

The homepage provides a coherent publisher identity through an operating-company name, physical address, telephone number, business registration, newspaper registrations, publication information, responsible editors, policies, and copyright notices. These are appropriate accountability disclosures for an established news publisher. No financial or brokerage services are presented, so financial-market licensing is not a relevant legitimacy criterion, and the available third-party broker context contains no matched record or adverse signal.

- The homepage footer identifies the operating company and supplies business and newspaper-registration details.
- The homepage names editorially responsible personnel and provides publication dates and policy notices.
- The homepage publishes a corporate address and telephone contact channel.
- The site's organization-validated TLS certificate identifies “(주)씨비에스미디어캐스트”; it was issued by Thawte TLS RSA CA G1 (OV) and is valid through 30 October 2026.

What to Verify Next

For unusually sensitive commercial engagements—such as advertising contracts, licensing arrangements, or content partnerships—the counterparty and payment instructions should be confirmed through the publisher’s independently established corporate channel. Users should also confirm that authentication or subscription pages remain within the expected domain and review the applicable privacy, subscription, and content-use terms before creating an account or commissioning services.

- The homepage presents advertising, partnership, subscription, and content-oriented functions that may lead to separate commercial workflows.
- Interactive testing completed successfully across two runs without destination mismatch or cloaking.
- All 19 observed external XHR requests and all 11 external POST requests were classified as benign, with none sent to an untrusted destination.
- The homepage exposed no sensitive data-entry form during analysis.

Summary Verdict

The website is a legitimate, established, and trustworthy news publisher. Its durable identity, continuous historical purpose, accountable editorial presentation, clean external reputation, and sound technical controls converge without contradiction. Normal browsing, account login, subscriptions, and standard use are appropriate.

Infrastructure Integrity

The site is served from South Korea through established data-center infrastructure, with transport encryption tied to an identified organization. No confirmed CDN/WAF determination is available, so no protective-edge inference is made; the observed hosting posture is mitigating operational context rather than standalone proof of legitimacy.

- The site is served from AS38107 (CDNetworks; CDNETWORKS-AS-KR-KR) at the observed South Korean address 61.110.208.140.
- The site’s transport encryption uses a valid organization-validated certificate with 87 days remaining at the time of observation.
- Hosting-abuse telemetry recorded an abuse confidence level of 0 and no reports for the observed infrastructure.

Closing Assessment

Prospective users may interact with the website normally, including using account and subscription functions, while applying standard counterparty confirmation procedures to exceptional or high-value commercial arrangements.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status

LIKELY

Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of nocutnews.co.kr.

- The request stayed on nocutnews.co.kr. It was not redirected to another domain. [CLEAR](#)
- Registration is published under Inames Co., Ltd.(http://www.inames.co.kr). [CLEAR](#)
- DNS for this domain is served by co.kr, across 2 name servers. [NOTED](#)
- The registration is paid up to 2030-07-24. [CLEAR](#)
- The earliest public archive of this site is from 2011-01-02. [CLEAR](#)
- It is hosted on CDNETWORKS-AS-KR-KR, from a server in KR. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about nocutnews.co.kr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
