

Is nom-domaine.fr legit? TrustSniffer's high-trust assessment: 80/100

nom-domaine.fr

Verdict

80

OUT OF 100

HIGH TRUST

nom-domaine.fr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Commercial French-language domain registrar page (nom-domaine/Viaduc) describing domain availability search, extension options, pre-reservation steps and support. Contains contact details, cookie controls and calls-to-action to reserve domains.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is a French-language commercial domain-registration website operated under the Viaduc brand, presenting domain-availability searches, extension selection, pre-reservation, email and hosting services, monitoring, customer support, and calls to reserve a domain; its apparent business model is paid domain registration, renewal, and related online services.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, confirmed malicious activity, or external blacklist indication. The site's content is coherent with a registrar business, includes contact and support pathways, and presents no suspicious payment, credential-harvesting, cryptocurrency, or deceptive investment mechanism. Its long-running historical continuity and clean external reputation are consistent with an established website, although the real-world operator identity remains apparently rather than independently verified.

EVIDENCE

- The homepage presents domain search, extension selection, pre-reservation, and support functions consistent with domain-registration services; no page-level fraud indicators were identified.
- The domain was registered in 2005 and is approximately 21.33 years old.
- Historical records contain 293 snapshots spanning 2004–2026, with 23 years tracked.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no confirmed blacklist or phishing finding.

Regulatory Verification Notes

The site appears to provide commercial registrar and hosting services rather than presenting itself as a regulated financial provider. The available material does not state a regulatory license or registration number; this is a disclosure point to clarify where a particular service or jurisdiction requires one, not evidence of fraud. The site's apparent commercial identity is supported by the registrar record and by an EV certificate naming Viaduc SAS, but those signals do not independently prove the legal operator or establish regulatory authorization.

EVIDENCE

- The homepage links to About, pricing, contact, and support pages, providing a basis for reviewing merchant terms and service disclosures.
- The domain registrar is recorded as VIADUC.
- The site's hosting telemetry shows AS16276, OVH - OVH SAS, FR.
- The transport certificate is EV, issued by GlobalSign GCC R3 EV TLS CA 2025, names Viaduc SAS, and is valid to 2027-01-11.

What to Verify Next

Before credential or payment interactions, an organization should independently reconcile the legal entity named in the site's About, pricing, and service terms with the merchant shown during checkout. Renewal pricing, cancellation and refund conditions, service-specific terms, and applicable consumer protections should be reviewed, and official contact channels should be confirmed through an independent route. Any claimed authorization relevant to the purchaser's jurisdiction should be checked against the appropriate public registry.

EVIDENCE

- The About and contact pages are the appropriate locations for confirming the operating entity and official contact routes.
- The pricing page should be checked for recurring renewal charges and service conditions.
- The domain-registration and hosting offering should be matched to the terms presented at the point of purchase.
- The site's account and checkout flows should be reviewed for the final merchant name and available payment-protection options.

Summary Verdict

The available evidence supports a high-trust, low-risk posture for an apparently legitimate and established website. No scam or impersonation contradictions were identified, but the connection between the website and a verified real-world operator is not independently established.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, which provides a useful mitigation against direct exposure and routine abusive traffic but is not, by itself, proof of legitimacy. The observed edge address is 5.135.106.10 on AS16276, associated with OVH - OVH SAS in France; no origin-server candidate was identified in the supplied infrastructure assessment.

Closing Assessment

Ordinary browsing and standard service evaluation are proportionate, while credential or payment use should follow the independent merchant-identity, contractual-term, and payment-protection checks described above.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of nom-domaine.fr.

- The request stayed on nom-domaine.fr. It was not redirected to another domain. CLEAR
- Registration is published under VIADUC. CLEAR
- DNS for this domain is served by viaduc-dns.fr, across 2 name servers. NOTED
- The registration is paid up to 2026-09-21. NOTED
- The earliest public archive of this site is from 2004-06-03. CLEAR
- It is hosted on OVH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about nom-domaine.fr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
