

Is notethis.org a scam? TrustSniffer's high-risk assessment: 0/100

notethis.org

Verdict

0

OUT OF 100

CRITICAL RISK

notethis.org shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

A minimal note-taking web app landing page prompting users to sign up or sign in; lacks pricing, legal, contact, or service detail.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

The page as captured

https://notethis.org/

What notethis.org served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2014.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

NoteThis.org presents a minimal web-based note-taking service offering account creation, sign-in, note sharing with friends and colleagues, and tab-based organization across devices; its apparent business model is to provide free user accounts, although monetization and operating details are not explained.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. External reputation evidence includes a confirmed blacklist status and multiple malicious detections, including detections by major security vendors. These signals are materially stronger than the site's limited benign behavioral observations and create a direct concern for credential submission. The homepage is also effectively a login-and-signup surface with little context about the service, while the real-world operator remains unverified. No conflicting legal-entity names or direct brand-impersonation finding were observed, but the confirmed blacklist and malicious detections constitute serious external contradictions.

EVIDENCE

- The homepage contains a sign-in form requesting an email address and password, alongside account-creation prompts.
- External reputation checks recorded 15 malicious detections and a confirmed blacklist status.
- Domain registration is dated 2018-05-10, with an age of 8.28 years; the registrar is GoDaddy.com, LLC.
- Historical records show first observation on 2014-12-18 and last observation on 2025-07-14, covering 12 years.

Regulatory Verification Notes

The homepage does not identify a legal operating entity, provide pricing or monetization information, or expose privacy, terms, licensing, or registration disclosures. This leaves the service's governance and regulatory position unclear rather than establishing a regulatory violation. The available evidence does not independently verify the operator's identity. No matching broker-reputation record was identified, but that absence is contextual only and is not a legal or licensing determination.

EVIDENCE

- The homepage states only "Simple note making for all of your devices," "Create an account, it's free," and note-sharing functionality.
- No privacy policy, terms of service, contact information, pricing, license claim, or registration number is visible on the captured page.
- The domain is served through AS14061, DIGITALOCEAN-ASN — DigitalOcean, LLC, US.
- The site's TLS certificate is issued by YR1 using DV validation and is valid to 2026-11-10.

What to Verify Next

Before any sensitive interaction, an independent operator identity should be established through corporate records and an independently sourced contact channel. Any applicable data-protection, software-service, or consumer-protection disclosures should be obtained directly from the operator and checked for consistency. Credential reuse should be avoided, and any account-protection decision should be based on confirmation that the service is genuinely operated by the expected entity.

EVIDENCE

- The homepage supplies an account signup and password-login workflow without accompanying legal or service documentation.
- The captured page has no external links providing an independent company profile, support route, privacy notice, or terms.
- The site's stated service purpose is limited to free note-taking and note sharing, with no explained commercial or governance model.

Summary Verdict

The website has a **critical-risk posture** for account access and other sensitive interactions. Its limited service context, unverified operator identity, and confirmed adverse external reputation signals do not support treating it

as a trustworthy destination for credentials or financial activity.

Infrastructure Integrity

CDN/WAF protection is present, and the observed address was associated with the edge layer rather than an independently observable origin. This reduces direct origin exposure but is only a mitigating infrastructure characteristic and does not offset the site's adverse reputation findings.

Closing Assessment

The appropriate near-term posture is read-only observation only; credential submission, account creation, and financial interaction should be withheld unless independent identity and service legitimacy checks produce satisfactory results.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, page content, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- The page presents a sign-in form, and the operator behind it could not be independently verified.
Page content rule:PAGE_TYPE_LOGIN_UNVERIFIED

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of notethis.org.

- The request stayed on notethis.org. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by binarymonster.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-10. NOTED
- The earliest public archive of this site is from 2014-12-18. CLEAR
- It is hosted on DIGITALOCEAN-ASN, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about notethis.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
