- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Nova Escola is a Brazilian educational publisher and content portal offering BNCC-aligned lesson plans, education news, teacher-development courses, classroom materials, donation support, and a WhatsApp-based lesson-planning service. Its apparent business model combines free educational content with certified and other online courses, donations, partnerships, and advertising.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent education-focused service, including lesson plans, articles, teacher resources, courses, account functions, donations, and the “Prof. Ane” WhatsApp planning tool; this is consistent with the stated educational publishing model rather than an abuse-oriented or impersonation pattern. The site also links to established social platforms, and external reputation checks recorded no malicious or suspicious detections, no blacklist result, and no abuse reports. The available evidence therefore supports an apparently legitimate, established website, while not independently proving the real-world operator’s identity.

EVIDENCE

- The homepage identifies Nova Escola as an educational resource portal with BNCC-aligned content, courses, classroom materials, account functions, donations, and WhatsApp lesson planning.
- The site’s social-navigation elements reference Facebook, Twitter, Instagram, LinkedIn, YouTube, and WhatsApp; no brand-impersonation indicator was detected.
- The domain was registered on 2005-12-27 and is 20.64 years old.
- Web archives contain 906 snapshots spanning 2008-07-05 to 2026-07-31, covering 19 tracked years.

Regulatory Verification Notes

The site’s apparent educational and publishing activities do not, on the supplied evidence, establish a regulated financial or brokerage activity. Its “Quem somos,” “Fale conosco,” partnership, donation, and course sections provide a recognizable organizational context, but the available material does not independently verify the legal operator or establish a licensing registration. This is a verification matter rather than evidence of scam activity. A separate broker-reputation check found no match, which is contextual support only and not a legal or licensing determination.

EVIDENCE

- The homepage navigation includes “Quem somos,” “Fale conosco,” “Trabalhe conosco,” “Seja parceiro,” “Faça uma doação,” and “Cursos certificados.”
- The business-model content describes educational publishing, online courses, donations, partnerships, and advertising; no financial-product offering or license claim is identified.
- The site is hosted on AS16509, Amazon.com, Inc., US.
- TLS uses the Amazon RSA 2048 M01 issuer with DV validation and is valid through 2027-02-17T23:59:59+00:00.

What to Verify Next

Before credential or payment interactions, an institution should independently confirm the operating organization through the site’s official organizational and contact channels, review the applicable course or donation terms, and confirm refund, cancellation, and payment-protection arrangements. Where a specific course, donation mechanism, or partnership invokes regulated activity, the relevant registry or counterpart should be checked independently rather than relying solely on on-site representations.

EVIDENCE

- The homepage exposes login/account and donation/contact forms, while no sensitive form or untrusted form destination was detected.
- The site offers both free and certified courses, making course-specific terms and refund conditions relevant to transactional review.
- The site’s contact, organizational, partnership, and donation pathways provide defined points for independent confirmation.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk educational website. The high-trust posture is supported by the site’s coherent public-service business model, long operating history, clean external reputation, and absence of contradictory or impersonation signals, although operator identity remains likely rather than independently verified.

Infrastructure Integrity

The website is protected by Amazon CloudFront CDN/WAF infrastructure, with all observed addresses functioning as CDN edge servers and no origin server address exposed in the analysis. This reduces direct origin exposure and is a mitigating infrastructure characteristic, but it is not independent proof of organizational legitimacy.

Closing Assessment

Standard browsing is proportionate to the evidence; account creation, course purchases, and donations should proceed only after the ordinary independent identity, terms, and payment-protection checks described above.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of novaescola.org.br.

- The request stayed on novaescola.org.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by co.uk, across 4 name servers. NOTED
- The registration is paid up to 2026-12-27. NOTED
- The earliest public archive of this site is from 2008-07-05. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about novaescola.org.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
