

Is noxxclient.org safe? TrustSniffer's low-trust assessment: 48/100

noxxclient.org

Verdict

48

OUT OF 100

LOW TRUST

noxxclient.org is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Governance Risk

Assessed 2026-09-30 by automated analysis. Classification confidence 55%.

What this site appears to be

Unofficial fan-made Fabric client for DonutSMP offering downloadable JARs and a list of cheating modules (aim assist, ESP, auto-clicker, base-finding tools). Includes install steps, FAQ and legal notice stating unofficial status.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://noxxclient.org/>

What noxxclient.org served when TrustSniffer captured it on 2026-09-30. The page may look different now.

Key findings

- Automated classification: Governance Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2026.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Noxx Client is an unofficial, fan-made Fabric game client for DonutSMP that presents a free downloadable JAR with more than 25 gameplay modules, installation guidance, FAQs, and a legal notice explaining its unofficial status. Its apparent purpose is to provide in-game advantages through features such as aim assistance, auto-clicking, ESP, base-finding, combat macros, and other client customisation tools.

Scam/Impersonation Risk

No confirmed blacklist, phishing, impersonation, or conflicting legal-entity identity was observed. However, the site distributes executable game-modification software and explicitly promotes cheating capabilities, creating a meaningful software-supply-chain and game-terms risk even though the pages show no payment mechanism, account login, sensitive form, wallet connection, or external submission behavior. External security telemetry recorded one suspicious result and one security-vendor detection, while broader checks did not confirm malicious status; this unresolved signal supports a verify-before-proceeding posture rather than a definitive fraud

conclusion. The site's claimed unofficial status also means the download should not be treated as endorsed by DonutSMP or by the underlying game platform.

EVIDENCE

- The homepage presents downloadable JAR files and lists Aim Assist, Auto Clicker, Trigger Bot, Block ESP, Player ESP, World Scanner, Chunk Finder, and related modules.
- The installation and FAQ material describes use with Fabric Loader and Fabric API; the legal notice identifies the project as unofficial.
- Domain registration telemetry records registration on 2026-09-21, with an age of 0.02 years.
- Archive telemetry records 1 snapshot across 1 year tracked, first seen on 2026-09-29 and last seen on 2026-09-29.

Regulatory Verification Notes

The available pages describe a fan-made software project rather than a regulated financial or commercial service. The site does not present a corporate operator, licensing authority, registration number, or formal endorsement, and the operator identity remains unverified; these are verification gaps rather than evidence of impersonation. The legal notice is useful in distinguishing the project from an official DonutSMP offering, but it does not independently establish who operates or maintains the software. No matching third-party broker or regulatory-reputation record was identified.

EVIDENCE

- The homepage labels the client as unofficial and frames it as a free DonutSMP utility rather than an official service.
- The site's legal and FAQ content provides project context but does not identify a verified legal operator or licensing authority.
- Hosting telemetry identifies AS214351 operated by FEMOIT - FEMO IT SOLUTIONS LIMITED, GB.
- The site's transport certificate is DV-validated, issued by YR2, and valid through 2026-12-24T15:15:47+00:00.

What to Verify Next

Before any download or execution, the project's association with DonutSMP should be confirmed through an independently obtained official channel, and the JAR should be examined in an isolated environment with file hashes, publisher information, and behavior monitored before use. The legal notice, software permissions, update process, and any stated source-code or release provenance should also be checked for consistency. Any support or project contact channel should be confirmed through an independent route rather than relying solely on the website.

EVIDENCE

- The homepage offers executable JAR downloads and identifies multiple modules that can alter gameplay behavior.
- The installation page specifies external components, including Fabric Loader and Fabric API, which should be obtained from their official distribution channels.
- The FAQ and legal pages provide project-use information but do not independently validate the operator or software provenance.

Summary Verdict

The overall posture is low trust, with the operating identity unverified and the available evidence insufficient to support routine reliance. No confirmed scam or impersonation contradiction was observed, but the unresolved external detection signal and the nature of the distributed software warrant a cautious, verify-before-proceeding assessment.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer against direct exposure, but it does not establish legitimacy; the observed address was a CDN edge address and the origin was not independently observable in this analysis. The infrastructure resolved through AS214351, with FEMOIT - FEMO IT SOLUTIONS LIMITED identified as the hosting provider, and the site used a valid DV TLS certificate issued by YR2.

Closing Assessment

Prospective users should treat the site as read-only until the project's provenance and file integrity have been independently established, and should avoid executing downloaded content in a normal user environment without appropriate isolation and monitoring.

Written analysis generated 2026-09-30 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of noxxclient.org.

- The request stayed on noxxclient.org. It was not redirected to another domain. CLEAR
- Registration is published under Internet Domain Service BS Corp. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-21. NOTED
- The earliest public archive of this site is from 2026-09-29. CLEAR
- It is hosted on FEMOIT, from a server in SC. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about noxxclient.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
