- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1999.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

NPO Start is an established Dutch public-service streaming platform presenting television series, films, documentaries, news, live sports, and broadcaster collections through free registration and an optional NPO Plus subscription, supported by public-media funding, advertising, and paid enhanced streaming access across the European Union.

Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing behavior, malicious reputation findings, or suspicious page-content signals were observed. The current public-media purpose is consistent with a long-established domain and extensive historical presence; the available archive evidence does not establish suspicious repurposing or a fundamental change of business category. The site therefore presents a low scam and impersonation risk.

- The homepage displayed coherent NPO Start branding and substantive public-service programming without deceptive forms, hidden credential collection, crypto solicitation, or browser-manipulation behavior.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, no reported infrastructure abuse, and no signature matches.
- The domain was registered on 19 May 1998 and is approximately 28.23 years old; registration is recorded through NPO.
- Historical records contain 5,000 archive snapshots spanning 27 November 1999 to 7 December 2017, covering 19 tracked years, while the domain maintains a strong global traffic footprint at rank 17,107.

Regulatory Verification Notes

The assessed content identifies an established public-service media and streaming operation rather than a brokerage, investment service, or other financial product requiring the licensing indicators ordinarily examined in a financial-services review. Organizational information, customer support, terms, and privacy-related policies are represented in the assessed site content. No financial license is claimed, and no third-party broker profile was matched; neither point constitutes an adverse regulatory finding for the stated business model.

- The homepage describes free registration and an optional NPO Plus subscription for enhanced streaming within the European Union.
- The assessed organizational and policy content includes customer-support, terms, and privacy-related information.
- The hosting infrastructure serves the site from AS16509 (AMAZON-02 — Amazon.com, Inc., US).
- The site's transport encryption uses a DV certificate issued by Amazon RSA 2048 M01, valid until 9 February 2027.

What to Verify Next

For institutional onboarding or a commercial relationship, due diligence should confirm the contracting entity, applicable subscription terms, privacy arrangements, payment conditions, and authorized customer-service channels directly through the site's official documentation. Prospective subscribers should also review geographic availability and cancellation conditions for the Plus service.

- The homepage distinguishes free account registration from the optional paid Plus offering.
- The homepage states that Plus supports continued streaming across the European Union.
- The site provides terms, privacy-related policies, organizational information, and customer-support material suitable for transaction-specific review.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong convergence across identity, historical continuity, page quality, traffic presence, technical security, and clean external reputation. Normal interaction, including account login, registration, subscription management, and standard use, is appropriate.

Infrastructure Integrity

The observed Amazon delivery environment and valid encrypted transport provide mainstream availability and connection-security controls. These measures reduce infrastructure exposure and support service integrity, while remaining corroborative safeguards rather than independent proof of legitimacy.

Closing Assessment

Prospective users may engage normally, subject to routine review of the contractual and privacy terms applicable to their intended use.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of npo.nl.

- The request stayed on npo.nl. It was not redirected to another domain. CLEAR
- Registration is published under NPO. CLEAR
- DNS for this domain is served by npohosting.nl, across 3 name servers. NOTED

- The earliest public archive of this site is from 1999-11-27. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about npo.nl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
