

Is nporadio1.nl legit? TrustSniffer's high-trust assessment: 100/100

nporadio1.nl

Verdict

100

OUT OF 100

HIGH TRUST

nporadio1.nl appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 55%.

What this site appears to be

Public broadcaster page for NPO Radio 1 with program listings, podcasts and news snippets. No evident forms requesting credentials or financial transactions.

Evidence status and limitations

Evidence completeness:

UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This website is an NPO Radio 1 public-broadcasting portal presenting live radio, programme schedules, podcasts, on-demand audio and news snippets. Its apparent purpose is content distribution and audience access rather than financial transactions, credential collection or commercial account activity.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent public-broadcasting service, with programme listings, named broadcasters and on-demand audio rather than investment offers, cryptocurrency features or payment requests. The page contains no login or sensitive-data forms, and technical interaction testing found no credential harvesting, wallet connection, cloaking, clipboard manipulation or brand-impersonation indicators. Independent reputation checks also returned no malicious or suspicious detections, supporting a low risk of scam or impersonation in the observed experience.

EVIDENCE

- The homepage contains radio schedules, live listening and viewing options, programme pages, podcasts and news excerpts.
- The homepage has zero forms, no sensitive form, and no external password-submission destination.
- The domain was registered on 2011-03-21, is approximately 15.4 years old, and lists NPO as registrar.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist hit.

Regulatory Verification Notes

The observed business model is informational public broadcasting, not a regulated financial or investment service, so the absence of a financial-services licence claim is not itself a scam indicator. The content is consistent with an established media service, including references to NOS, KRO-NCRV, EO, MAX and WNL programming. The site is apparently legitimate on the available evidence, but the real-world operator identity has not been independently verified; the on-page material therefore supports, rather than proves, the connection to the NPO Radio 1 service. Limited machine-readable page metadata is a presentation and discoverability weakness, not an identity contradiction. No relevant broker-reputation match was identified.

EVIDENCE

- The homepage identifies programme providers and presenters across the displayed schedule.
- The page is classified as an informational news/radio portal with a low-risk business model and no financial transaction surface.
- The domain is within the top one million sites by observed traffic, with a meaningful established audience footprint.

What to Verify Next

Before credential or payment interactions, independently confirm the service relationship through an established NPO channel rather than relying solely on the page itself. Review the site's privacy, copyright, terms and contact information through the official navigation, and confirm that any future account or payment flow uses the expected service domain and provides ordinary payment-protection and dispute mechanisms. For enterprise use, retain the independently sourced operator confirmation with the vendor or third-party risk record.

EVIDENCE

- The observed homepage provides content access without a credential or payment workflow.
- The available identity evidence is consistent with NPO Radio 1 but does not independently verify the real-world operator.
- The service is presented as content distribution rather than a financial or transactional platform.

Summary Verdict

The overall posture is high trust and low risk for the observed browsing and content-access use case. Available evidence is consistent with an established, apparently legitimate website, while operator identity remains independently unverified.

Infrastructure Integrity

The site resolves directly to infrastructure associated with Stichting Nederlandse Publieke Omroep in the Netherlands rather than a detected third-party CDN edge. This provides useful hosting attribution, although hosting association alone is only a mitigating technical signal and does not independently establish legitimacy. Transport encryption is enabled through a valid domain-validated certificate issued by YE1.

EVIDENCE

- Hosted on AS25182, PUBLIEKE-OMROEP-AS — Stichting Nederlandse Publieke Omroep, NL; resolved IP address 145.58.30.3.
- TLS certificate issuer: YE1; validation level: DV; valid to 2026-09-08.
- Infrastructure resolution identified 1 unique IP, 0 edge IPs and 1 likely origin IP; no CDN was detected.

Closing Assessment

Normal browsing and content consumption are proportionate to the available risk posture. Any credential or payment interaction should nevertheless follow the ordinary independent identity, policy and payment-protection checks appropriate to the transaction.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of nporadio1.nl.

- The request stayed on nporadio1.nl. It was not redirected to another domain. CLEAR
- Registration is published under NPO. CLEAR
- DNS for this domain is served by creation, across 6 name servers. NOTED
- It is hosted on PUBLIEKE-OMROEP-AS, from a server in NL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about nporadio1.nl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
