

Is nsujanani.com a scam? TrustSniffer's high-risk assessment: 0/100

nsujanani.com

Verdict

0

OUT OF 100

CRITICAL RISK

nsujanani.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Single-line placeholder page: 'Site under construction'. No links, forms, or claims present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

Site under construction

What nsujanani.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

nsujanani.com is a minimal “Site under construction” landing page with no visible service description, transaction capability, or stated commercial purpose; its apparent business model cannot currently be determined from the website itself.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk** because external threat intelligence records a confirmed blacklist status, including twelve malicious detections and one suspicious detection, with tier-one detections associated with Kaspersky and Sophos. These signals are materially stronger than the benign observations from the otherwise empty homepage: no phishing form, credential prompt, wallet interaction, external submission, or active abuse pattern was observed. No separate identity inconsistency or brand-impersonation finding was established, but the operator’s identity remains unverified and the site’s minimal content provides no basis to explain or rebut the external detections. The domain’s long registration history does not neutralize the current reputation risk.

EVIDENCE

- External reputation assessment recorded 12 malicious and 1 suspicious detections; Kaspersky and Sophos were listed among the flagged vendors, and the domain was marked by external blacklist intelligence.
- Registration records show the domain was registered in 2002, approximately 23.87 years old, through Domain.com – Network Solutions, LLC.
- Historical records show 23 archive snapshots spanning 2002–2025, with 24 years tracked; no suspicious repurposing was identified in the historical assessment.

Regulatory Verification Notes

The homepage contains no company name, legal-entity information, licensing statement, registration number, regulated-service description, or linked legal documentation. This is a substantial disclosure gap for any future activity involving financial, investment, brokerage, or other regulated services, although the current page does not visibly claim to offer such services. Independent identity verification is unavailable from the site evidence, and the absence of a match in the reviewed broker-reputation dataset should be treated only as neutral context, not as regulatory confirmation. The site's valid transport certificate and identifiable hosting arrangement are technical facts, not evidence of licensing or operator legitimacy.

EVIDENCE

- The homepage displays only "Site under construction" and contains no company, license, registration, terms, or regulatory disclosures.
- The site is hosted on AS46606, Unified Layer, US.
- TLS uses issuer YR2 with domain validation (DV), valid through 2026-11-06.

What to Verify Next

Before any sensitive interaction, an independent party should establish the real-world operator through an offline or independently sourced contact route and confirm any claimed authorization with the relevant financial or commercial registry. If the site later introduces account, payment, investment, or other sensitive functionality, the domain and operator should be matched against the provider's independently published records before use. Official support and contact channels should also be confirmed independently rather than relying solely on information introduced by the site.

EVIDENCE

- The homepage contains no links to legal, support, identity, or regulatory information.
- No login form, sensitive form, wallet connection, or external form submission was observed on the captured page.
- Browser testing recorded no external network requests or hidden forms during two successful runs.

Summary Verdict

The overall posture is critical, with the available evidence unsuitable for trust in sensitive interactions. The site cannot presently be treated as an established or independently verified legitimate service, and the external

reputation findings outweigh its limited benign technical behavior.

Infrastructure Integrity

The domain resolves directly through Unified Layer in the United States on AS46606, with one identified IP and no detected CDN or WAF layer. The absence of an intermediary protection layer does not prove maliciousness, but it provides no additional edge-control or origin-shielding mitigation for the already elevated reputation concern.

Closing Assessment

Passive viewing is the maximum appropriate posture at present; login, credential submission, financial activity, and other sensitive engagement should be withheld unless independent operator and authorization checks produce clear, credible confirmation.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of nsujanani.com.

- The request stayed on nsujanani.com. It was not redirected to another domain. CLEAR
- Registration is published under Domain.com - Network Solutions, LLC. CLEAR

- DNS for this domain is served by xellenthost.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-12. NOTED
- The earliest public archive of this site is from 2002-11-25. CLEAR
- It is hosted on UNIFIEDLAYER-AS-1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about nsujanani.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
