

Is numerologynumber.net safe? TrustSniffer's low-trust assessment: 25/100

numerologynumber.net

Verdict

25

OUT OF 100

LOW TRUST

numerologynumber.net is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

A WordPress-based numerology/astrology informational site with articles, calculators and an ecommerce section offering related products. Uses PayPal for checkout and includes cookie/privacy controls and social share buttons. No immediate indicators of phishing or financial fraud.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What numerologynumber.net served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is a WordPress-based numerology and astrology information service presenting articles, calculators, social-sharing features, and a small online shop for related products, with revenue apparently derived from product sales and associated online activity.

Scam/Impersonation Risk

The site's visible content does not present immediate phishing, credential-harvesting, wallet, or financial-abuse indicators: the captured pages contain no login form, hidden form, external password form, wallet connection, or clipboard manipulation. However, this benign presentation is outweighed by a confirmed external blacklist status and multiple malicious detections, creating a substantial contradiction between the site's ordinary informational appearance and its external threat reputation. No conflicting legal-entity names or direct brand-impersonation indicators were observed, but the confirmed blacklist finding is sufficient to support a clearly cautionary posture for sensitive interactions.

EVIDENCE

- The homepage presents numerology and astrology articles, calculators, cookie controls, and social-sharing functions; page analysis recorded no red flags.
- The site's checkout and contact functionality was observed without a login form, hidden form, password submission to an external destination, wallet connection, or clipboard-hijacking behavior.
- External reputation evaluation recorded 5 malicious detections and 1 suspicious detection, together with a confirmed blacklist status.
- The domain registration record shows registration on 2010-07-28, with an age of 16.08 years.

Regulatory Verification Notes

The available content describes an informational and small-e-commerce business rather than a regulated financial service. It offers amulets, eBooks, and jewellery and uses PayPal for checkout; no financial products, investment returns, or regulated-service license claims were identified. The available site material does not clearly establish the operating legal entity or disclose a license or registration number. This is a regulatory and merchant-transparency gap, not by itself proof of fraud, but it prevents independent confirmation of who is responsible for sales, fulfilment, refunds, and data handling. The registration record identifies GoDaddy.com, LLC as registrar and uses Registration Private through Domains By Proxy, LLC; this is an administrative ownership limitation rather than an identity contradiction. The ordinary WordPress presentation, stable page behaviour, PayPal payment integration, and valid transport encryption are positive operational signals, but they do not offset the external reputation finding.

EVIDENCE

- The shop, cart, checkout, contact, and account paths are exposed in the site's internal link structure; the business model is informational content with small-scale e-commerce.
- The available page content contains no claimed license authority or license number.
- The TLS certificate is DV-validated, issued by YR1, and valid to 2026-10-22.
- The site is registered through GoDaddy.com, LLC; the registration record lists Registration Private and Domains By Proxy, LLC.

What to Verify Next

Before any account creation, payment, or submission of personal information, the prospective user should independently confirm the merchant's legal identity, physical business details, refund and fulfilment terms, and the legitimacy of the relevant payment destination. Any claimed regulatory status should be checked directly with the applicable government or industry registry rather than relying on the website's own statements. Official contact channels should also be confirmed through an independent route, and payment-protection options should be preserved for any transaction.

EVIDENCE

- The site exposes separate contact, checkout, cart, and account paths, making merchant and transaction controls material to the review.
- The business model includes ecommerce sales and PayPal checkout rather than a clearly identified regulated service.
- The available disclosure state does not provide a clear legal-entity or licensing basis for independent confirmation.

Summary Verdict

The website has a **low-trust posture** for sensitive interaction. Its conventional informational appearance and technically functional pages do not overcome the confirmed external reputation contradiction, and the real-world operator remains only likely rather than independently verified.

Infrastructure Integrity

The site resolves directly to a single US-based hosting endpoint with no detected CDN or WAF edge layer; the hosting infrastructure is identified as Oracle Corporation's ORACLE-BMC-31898 service on AS31898. This provides a concrete hosting attribution but no legitimacy assurance. Transport encryption is present through the YR1 DV certificate, valid until 2026-10-22, which protects the connection but does not validate the operator or site content.

EVIDENCE

- Hosted on AS31898, identified as ORACLE-BMC-31898 - Oracle Corporation, US.
- The resolved infrastructure contains 1 unique IP, 0 edge IPs, and 1 likely origin IP; no CDN was detected.
- TLS validation level is DV; issuer is YR1; certificate validity ends 2026-10-22.

Closing Assessment

Sensitive actions should be deferred unless the operator, transaction terms, and official contact channels are independently validated through trusted external sources.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of numerologynumber.net.

- The request stayed on numerologynumber.net. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by websitewelcome.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-07-28. [NOTED](#)
- The earliest public archive of this site is from 2010-10-24. [CLEAR](#)
- It is hosted on ORACLE-BMC-31898, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about numerologynumber.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
