

Is nurse-scout.com a scam? TrustSniffer's high-risk assessment: 0/100

nurse-scout.com

Verdict

0

OUT OF 100

CRITICAL RISK

nurse-scout.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Default XServer hosting initial page in Japanese indicating no homepage uploaded; points users to support manual and XServer site.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What nurse-scout.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website currently presents only an XServer default hosting page in Japanese stating that no homepage has been uploaded. It does not present an operating business, identifiable service, customer portal, or other substantive purpose to visitors; its apparent function is an unconfigured hosting space rather than an active public website.

Scam/Impersonation Risk

The site is subject to a critical sensitive-interaction risk assessment. External security intelligence records a confirmed blacklist status supported by multiple sources, including 17 malicious detections, while the collection also identified Tier 1 threat detections. These findings are materially inconsistent with treating the domain as suitable for trusted interaction, even though the visible placeholder contains no login form, payment form, credential request, or overt brand-impersonation content. Behavioral collection additionally recorded non-whitelisted external requests and posts, substantial DOM changes after interaction, and a suspicious network

classification; these signals are relevant because the current placeholder may not represent the content that would be served in another context. No identity contradiction between distinct legal-entity names was observed.

EVIDENCE

- The homepage is an XServer initial-page placeholder with no uploaded site content, no forms, and no sensitive input fields.
- External reputation evaluation recorded 17 malicious detections and a confirmed blacklist status from two external blacklist sources.
- Browser analysis recorded 14 external XHR requests, 16 external posts, 2 non-whitelisted external posts, and a maximum post-interaction DOM difference of 3,367.

Regulatory Verification Notes

The observed site provides no operating-company identity, legal terms, licensing statement, registration number, or service disclosures because only the hosting placeholder is presented. The operator identity therefore remains unverified and ownership opacity is present; this is a material transparency gap for any party presenting the domain as a commercial, financial, employment, or regulated service. The absence of an active business page means there is no substantive regulatory claim to validate, and it should not be interpreted as evidence that any future service associated with the domain is licensed. The domain is registered through GMO Internet Group, Inc. d/b/a Onamae.com, but registrar information does not independently establish the operator's identity or legitimacy.

EVIDENCE

- WHOIS records show registration on 2024-10-11; the domain is approximately 1.86 years old.
- The registration registrar is GMO Internet Group, Inc. d/b/a Onamae.com.
- The site's transport encryption uses a DV certificate issued by YR1, valid to 2026-10-08.
- The homepage title and body identify XServer hosting and instruct the account holder to upload website files; they do not identify the domain operator or a regulated activity.

What to Verify Next

Before any sensitive interaction, an enterprise or prospective user should independently establish who controls the domain through an offline or otherwise trusted channel and confirm that any claimed organization, service, or licensing status corresponds to an authoritative registry. Any later page that requests credentials, payments, document uploads, or account authorization should be assessed as a new interaction surface rather than assumed to be represented by the current placeholder. Official support and contact channels should be confirmed independently before engagement, and the domain should remain limited to passive observation unless those checks produce a satisfactory result.

EVIDENCE

- The current homepage contains no active service description or interaction workflow against which an operator claim could be validated.
- No login form, hidden sensitive form, wallet connection, or password-submission form was detected during page analysis.
- The authoritative assessment identifies login, credential, and financial interactions as unsuitable use cases.

Summary Verdict

The overall posture is critical, with the domain unsuitable for sensitive interaction and its apparent legitimacy not established. The confirmed external threat reputation outweighs the limited benign characteristics of the currently displayed hosting placeholder.

Infrastructure Integrity

The site resolves directly to a single likely origin hosted by XSERVER - Xserver Inc. in Japan, on AS131965, with no detected CDN or WAF edge layer. This infrastructure is a concrete hosting arrangement rather than evidence of operator legitimacy; the absence of a protective intermediary provides no additional mitigation for the external reputation findings.

Closing Assessment

The appropriate enterprise disposition is to block or quarantine sensitive interaction with the domain pending independent operator validation and authoritative confirmation of any future service presented there.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of nurse-scout.com.

- The request stayed on nurse-scout.com. It was not redirected to another domain. CLEAR
- Registration is published under GMO Internet Group, Inc. d/b/a Onamae.com. CLEAR
- DNS for this domain is served by xserver.jp, across 5 name servers. NOTED
- The registration is paid up to 2026-10-11. NOTED
- The earliest public archive of this site is from 2013-07-08. CLEAR
- It is hosted on XSERVER, from a server in JP. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about nurse-scout.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
