

Is nutritiongeeks.co legit? TrustSniffer's high-trust assessment: 99/100

nutritiongeeks.co

Verdict

99

OUT OF 100

HIGH TRUST

nutritiongeeks.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 70%.

What this site appears to be

Online supplement retailer (Nutrition Geeks) featuring product catalog, bundles, customer reviews, shipping policy and contact information. Typical ecommerce checkout and payment options are displayed.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Nutrition Geeks is a consumer-facing online supplement retailer presenting product listings, bundles, health-goal categories, customer reviews, shipping information, contact support, and conventional checkout options for direct-to-consumer sales.

Scam/Impersonation Risk

No contradictions were observed across the reviewed site content and external reputation checks. The homepage presents a coherent supplement-retail model, including collagen, creatine, vitamins, omega-3 products, bundles, customer reviews, and shipping information; it also claims more than four million customers and an “Excellent” Trustpilot rating, which are marketing assertions rather than independent proof of scale. No phishing, credential-harvesting, brand-impersonation, or malicious-content indicators were identified. A contact-channel integrity anomaly is present because the published address **[suspicious email address not provided in evidence]** appears to have a malformed top-level domain; this should be treated as a minor deliverability or possible typosquat concern, not as evidence of a scam. Abuse reports associated with the observed shared delivery infrastructure were discounted because they apply to a whitelisted CDN address rather than being site-specific.

EVIDENCE

- Homepage: Presents a supplement catalogue, bundles, customer reviews, shipping information, and standard ecommerce checkout functionality.
- Homepage: Displays the claims of “4,000,000+ customers & counting” and an “Excellent” Trustpilot rating.
- Site behavior: No hidden forms, password submissions to external destinations, wallet-drainer activity, clipboard hijacking, or cloaking was detected.
- Shared delivery infrastructure: The observed CDN IP has 9 abuse reports, with a confidence score of 0 and shared-infrastructure attribution.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate ecommerce website, but it does not independently verify the real-world operator. The reviewed material does not display a regulatory license or registration number; for a dietary-supplement retailer, this is a transparency and merchant-verification point

rather than a scam indicator. The site does provide commercial-facing content such as contact information, shipping and returns information, customer reviews, and payment options. Registration privacy is an administrative detail and does not create an identity contradiction.

EVIDENCE

- Domain registration: Registered 2020-05-13 (~6.25 years old), with expiry recorded as 2027-05-13; registrar: IONOS SE.
- Web archive: 123 snapshots spanning 2021–2026 (6 years tracked), with a maximum recorded gap of 1 year and historical continuity score of 1.
- Hosting: Served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- Transport security: TLS certificate issued by YE2, validation level DV, valid to 2026-11-04.

What to Verify Next

Before credential or payment interactions, an independent merchant-identity check should reconcile the trading name, legal entity, and contact details shown on the site with an authoritative business source. The applicable consumer-protection or food-supplement requirements for the purchasing jurisdiction should also be checked, particularly where product health claims or cross-border delivery are involved. Payment should be made through a method offering transaction dispute or purchase protection, and the published support channels should be confirmed through an independent route before resolving delivery, refund, or account issues.

EVIDENCE

- About, contact, shipping, and returns pages: Use these pages as the source set for reconciling the merchant identity and fulfillment terms.
- Product pages: Review ingredient, dosage, health-claim, and jurisdictional compliance information before purchase.
- Checkout: Confirm the final seller name, currency, delivery destination, refund terms, and payment-protection options before authorizing a transaction.

Summary Verdict

The overall posture is high trust and low risk, with no observed scam or impersonation contradictions. The website is best characterized as an established, apparently legitimate online retailer, while the operator's real-world identity remains likely rather than independently verified.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a meaningful mitigating control by placing the site behind managed edge infrastructure; the observed address is an edge endpoint and the origin server was not observable. This supports resilience and exposure reduction but is not, by itself, proof of merchant legitimacy.

Closing Assessment

Ordinary browsing and standard ecommerce use are proportionate to the assessed posture, subject to the independent merchant, product-compliance, and payment-protection checks outlined above.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 9 reports on hosting IP 23.227.38.32 (Shopify, Inc., Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of nutritiongeeks.co.

- The request stayed on nutritiongeeks.co. It was not redirected to another domain. CLEAR
- Registration is published under IONOS SE. CLEAR
- DNS for this domain is served by ui-dns.biz, across 4 name servers. NOTED
- The registration is paid up to 2027-05-13. NOTED
- The earliest public archive of this site is from 2021-06-15. CLEAR
- It is hosted on CLOUDFLARENET, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about nutritiongeeks.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
