Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Nuvemshop is an established-looking Latin American e-commerce SaaS platform that presents online-store creation and management services for businesses, with an apparent subscription and services-based model.

Scam/Impersonation Risk

No scam, phishing, impersonation, blacklist, or conflicting-identity indicators were observed. The homepage presents a coherent commercial SaaS proposition, links to established social platforms, and provides signup, login, and sales-contact pathways without exposing a password form or hidden sensitive form in the captured experience. Behavioral inspection identified suspicious inline scripting and some non-whitelisted external activity, but no cloaking, wallet activity, clipboard manipulation, or password-submission behavior; these signals do not establish an identity contradiction and are not inconsistent with the authoritative low-risk assessment. The available evidence is therefore consistent with an established, apparently legitimate website, while the real-world operator identity remains not independently verified.

EVIDENCE

- Domain registration record: created 2012-02-02 and approximately 14.55 years old.
- Homepage content: coherent Nuvemshop branding, commercial SaaS positioning, and links to Facebook, Instagram, TikTok, WhatsApp, Pinterest, and Twitter.
- Homepage behavior: 4 suspicious inline scripts, 81 external XHR requests, and 59 external POST requests; no hidden forms, password external forms, wallet-provider activity, or cloaking detected.

Regulatory Verification Notes

The site presents a commercial e-commerce platform rather than a specifically regulated financial service. Its stated offerings include store creation, migration, social-commerce integrations, Nuvem Pago payments, Nuvem Envio logistics, AI-enabled tools, pricing plans, and app integrations. The available content does not establish a regulatory license or registration number, so the principal regulatory issue is a disclosure and verification gap rather than evidence of fraud. The site's transport encryption is valid but domain-validated, which supports secure transmission without independently confirming the legal identity of the operator. No matching broker-reputation record was identified; that is contextual reputation evidence, not a licensing determination.

EVIDENCE

- Homepage: describes store creation, migration, payments, logistics, AI tools, pricing tiers, and integrations.
- Site transport encryption: TLS issued by WE1, validation level DV, valid to 2026-10-22T23:24:03+00:00.
- Available site content: no license authority or license number is stated in the supplied business-model evidence.

What to Verify Next

Before credential or payment interactions, the prospective customer should confirm the contracting legal entity through an independent corporate registry, review the applicable pricing, cancellation, refund, privacy, and security terms, and confirm payment-protection arrangements. Any regulated payment activity should be matched to the relevant licensed entity or service provider through the appropriate official registry. Official support and contact channels should also be confirmed through an independent route rather than relying solely on contact details presented during an online session.

EVIDENCE

- Homepage: exposes signup, login, and contact-sales pathways but no sensitive form was captured.
- Business-model evidence: identifies subscription plans, add-on services, and integrated payment and fulfillment offerings.
- Registration record: lists LINKED STORE BRASIL CRIACAO E DESENVOL DE SOFTWARE as the registrant, but this record alone does not independently verify the operator's commercial role.

Summary Verdict

The overall posture is high trust and low risk, with multiple converging signals supporting an established, apparently legitimate website and no observed contradiction associated with scam or impersonation activity.

Confidence in the classification is positive, but the operator’s real-world identity should remain treated as likely rather than proven.

Infrastructure Integrity

The site resolves through direct hosting infrastructure operated by LINKED STORE BRASIL CRIACAO E DESENVOL DE SOFTWARE in Brazil; no CDN edge layer was detected, and the infrastructure record identifies likely origin hosting rather than a concealed third-party edge. This is a neutral technical posture and should not be treated as proof of legitimacy.

EVIDENCE

- Hosting: served from AS273584, LINKED STORE BRASIL CRIACAO E DESENVOL DE SOFTWARE, BR; registry LACNIC; country BR.
- Resolution: 2 unique IPs, 0 CDN edge IPs, and 2 likely origin IPs.

Closing Assessment

Normal evaluation and use are proportionate to the site’s high-trust, low-risk posture, subject to routine independent checks of merchant identity, contractual terms, and payment protections before sensitive transactions.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of nuvemshop.com.br.

- The request stayed on nuvemshop.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-05.org, across 4 name servers. NOTED
- The registration is paid up to 2031-02-02. CLEAR
- It is hosted on AS273584, from a server in BR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about nuvemshop.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
