

Is nyunguyamawe.com legit? TrustSniffer's high-trust assessment: 90/100

nyunguyamawe.com

Verdict

90

OUT OF 100

HIGH TRUST

nyunguyamawe.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

A WordPress site for Nyungu Yamawe Forest Park offering information about cottages, camping, activities and a booking form to reserve stays. No obvious impersonation or high-risk financial solicitations present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Nyungu Yamawe Forest Park is a local accommodation and leisure website presenting cottages, camping, forest activities, events, attractions, a bar and café, and an online booking form for reserving stays at its park in Kira, Uganda.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other identity contradiction was observed. The site's content is consistent with a hospitality and leisure business rather than a high-risk financial or credential-harvesting operation: it provides park information, accommodation options, activities, and a booking form without a login form or external password submission. Behavioral testing did detect hidden form elements and substantial page-structure changes after interaction, but no external password forms, wallet activity, cloaking, suspicious inline scripts, or non-whitelisted external posts were identified; these signals therefore appear more consistent with ordinary website implementation than with a confirmed abuse pattern. The domain has also maintained registration continuity for several years, supporting an established-site assessment, although this does not independently verify the operator's real-world identity.

EVIDENCE

- The homepage describes Nyungu Yamawe Forest Park, its cottages, camping capacity, forest activities, amphitheater, bar and café, and local attractions.
- The booking page contains accommodation-selection and guest-detail fields but no password field or login workflow.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, 0 abuse reports, and no blacklist hit.
- Domain registration: 2020-10-18T12:23:41Z; age 5.84 years.

Regulatory Verification Notes

The apparent business model is ordinary accommodation, events, food and beverage, and leisure services. The available site content does not present a license, registration number, or independently verifiable regulatory authorization; for this type of hospitality business, that is a disclosure and verification point rather than evidence of impersonation or fraud. Public registration uses the name “Domain Admin” with “Whois Privacy Corp.”, and the registrar is Internet Domain Service BS Corp.; this limits direct attribution of the operator but is not, by itself, an identity contradiction. The page title still includes “Just another WordPress site,” and the site lacks visible structured metadata, indicating modest presentation and transparency weaknesses rather than a security finding.

EVIDENCE

- The booking and homepage content presents accommodation and park services, with no financial-product or regulated-investment claims.
- The domain registrar is Internet Domain Service BS Corp.; the registrant fields identify “Domain Admin” and “Whois Privacy Corp.”
- The site's transport encryption uses a DV certificate issued by YR1, valid through 2026-09-24T18:03:56+00:00.
- The homepage title is “Nyungu Yamawe Forest Park – Just another WordPress site.”

What to Verify Next

Before credential or payment interactions, an independent check should confirm the legal trading identity of the park, the physical location, and the official contact channels through a source separate from the website. The booking process should be checked for clear cancellation, refund, and payment-protection terms, and any locally applicable hospitality or event authorization should be confirmed with the relevant authority where material to the planned transaction.

EVIDENCE

- The booking page requests arrival date, number of nights, cottage type, number of adults, first name, and email address, and displays a total price field.
- The site navigation includes dedicated sections for accommodation, events, attractions, and contact information.
- The published business model is service-based accommodation and leisure activity rather than a regulated financial offering.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website supporting a high-trust, low-risk posture. No contradictory signals were observed, while the operator's real-world identity remains independently unverified.

Infrastructure Integrity

The site resolves to Oracle Corporation hosting in the United States, with one identified address and no CDN or WAF detected. This is a conventional, technically identifiable hosting arrangement and provides some infrastructure assurance, although hosting infrastructure alone does not establish business legitimacy.

EVIDENCE

- Served from AS31898 (ORACLE-BMC-31898 – Oracle Corporation, US).
- Resolved hosting address: 50.6.111.18; one unique IP and one likely origin IP were identified.
- TLS validation level: DV; issuer: YR1; valid to 2026-09-24T18:03:56+00:00.

Closing Assessment

Normal browsing and ordinary booking consideration are proportionate to the available evidence; independent merchant-identity, cancellation-policy, and payment-protection checks should be completed before submitting credentials or making a payment.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of nyunguyamawe.com.

- The request stayed on nyunguyamawe.com. It was not redirected to another domain. CLEAR
- Registration is published under Internet Domain Service BS Corp.. CLEAR
- DNS for this domain is served by hostingdoves.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-18. NOTED
- The earliest public archive of this site is from 2020-12-07. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about nyunguyamawe.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
