

Is occupationalhealthkzn.co.za legit? TrustSniffer's high-trust assessment: 100/100

occupationalhealthkzn.co.za

Verdict

100

OUT OF 100

HIGH TRUST

occupationalhealthkzn.co.za appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Website for Dr T George Inc. / Occupational Health KZN detailing services (occupational medicals, travel vaccines, mobile clinics), branch locations, professional affiliations (SAMSA, HPCSA, SAMA, etc.), contact number and appointment request. Appears to be a local healthcare provider oriented to both individual and corporate clients.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is the online presence of Dr T George Inc. and Occupational Health KZN, presenting occupational-health, general-practice, travel-medicine, vaccination, mobile-clinic, and workplace medical services for individual and corporate clients, with branch information and appointment-request functionality.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, blacklist, malware, or malicious-reputation indicators. The homepage presents a coherent local healthcare model, identifying Dr T George Inc., describing occupational medicals, travel vaccinations, yellow-fever certification, mobile clinics, and UK oil-and-gas medicals, while naming branches in Chatsworth, Tulbagh, and Umbogintwini. The presentation is consistent with a professional medical-service website rather than a deceptive or abuse-oriented operation. The published contact-channel anomaly, "031", is a minor contact-integrity issue because it appears incomplete as a telephone number, but it does not establish impersonation or fraud.

EVIDENCE

- The homepage identifies “Dr T George Inc. – Occupational Health Services” and describes occupational, general-practice, travel, vaccination, and mobile-clinic services.
- The homepage lists Chatsworth, Tulbagh, and Umbogintwini as branches and includes a request-appointment pathway.
- Browser testing recorded 2 successful runs, 0 external XHR requests, 0 hidden forms, 0 wallet activity, and no cloaking or suspicious scripts.
- Domain registration evidence: Registered 2017-04-26 (~9.32 years old), with expiry recorded as 2027-04-26.

Regulatory Verification Notes

The available content identifies a healthcare practice and refers to professional affiliations including SAMSA, HPCSA, and SAMA. However, the supplied site evidence does not provide a license number or independently verified regulatory registration, so the professional and regulatory standing remains a matter for ordinary external confirmation rather than a finding of misconduct. The available external reputation checks contained no malicious or suspicious result, and no matching broker-reputation record was identified. The absence of richer search-engine metadata and structured markup is a technical presentation limitation, not a legitimacy contradiction.

EVIDENCE

- The homepage lists SAMSA medicals and refers to HPCSA, SAMA, and other industry affiliations.
- The services content describes medical assessments, yellow-fever certification, travel vaccinations, malaria prophylaxis, and onsite corporate medical services.
- Hosted on AS37611, Afrihost SP (PTY) LTD, ZA.
- TLS certificate: issuer YR2, DV validation, valid to 2026-10-16T22:29:26+00:00.

What to Verify Next

Before a credential or payment interaction, an organization should independently confirm the practitioner’s professional registration and the practice’s current contact details through the relevant South African professional or industry registries. For paid appointments, the organization should also confirm cancellation, refund, and payment-protection terms through an independently obtained contact route rather than relying solely on information submitted through the website.

EVIDENCE

- The homepage provides service descriptions, branch locations, a contact number, and an appointment-request option.
- The supplied analysis records no sensitive form, external form destination, or login form.
- The site links to Facebook and LinkedIn profiles, which can provide an additional independent route for confirming the practice’s current presence.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate healthcare website and supports a high-trust, low-risk posture. The site’s apparent legitimacy is well supported by coherent service content, stable technical behavior, clean available reputation signals, and a long-established domain, although the real-world operator identity has not been independently verified.

Infrastructure Integrity

The site resolves directly to infrastructure operated by Afrihost SP (PTY) LTD in South Africa, with no CDN or WAF detected and one identified origin address. This is a conventional hosting arrangement and does not itself create a security concern; the site’s valid transport encryption provides the principal technical protection observed.

EVIDENCE

- Hosting provider: Afrihost SP (PTY) LTD - AFRIHOST SP (PTY) LTD, ZA; AS37611; AFRINIC registry; South Africa.
- Infrastructure resolution identified 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- The transport layer uses a valid DV TLS certificate issued by YR2, expiring 2026-10-16T22:29:26+00:00.

Closing Assessment

Normal browsing and appointment-related use are proportionate to the assessed posture, while independent confirmation of practitioner credentials, business details, service terms, and payment protections should precede material financial or credential-based interaction.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of occupationalhealthkzn.co.za.

- The request stayed on occupationalhealthkzn.co.za. It was not redirected to another domain. CLEAR
- Registration is published under Afrihost. CLEAR

- DNS for this domain is served by co.za, across 4 name servers. NOTED
- The registration is paid up to 2027-04-26. NOTED
- The earliest public archive of this site is from 2021-12-20. CLEAR
- It is hosted on AFRIHOST SP (PTY) LTD, from a server in ZA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about occupationalhealthkzn.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
