

Is odinmod.org safe? TrustSniffer's moderate-trust assessment: 50/100

odinmod.org

Verdict

50

OUT OF 100

MODERATE TRUST

odinmod.org is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Assessed 2026-10-01 by automated analysis. Classification confidence 75%.

What this site appears to be

A descriptive download page for Odin Mod 26.3 (Fabric) — a free Hypixel Skyblock utility mod with 61+ modules, install steps, feature list, and FAQ. No payment, login, or credential collection present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://odinmod.org/

What odinmod.org served when TrustSniffer captured it on 2026-10-01. The page may look different now.

Key findings

- Automated classification: Governance Risk.
- Domain age: less than 1 year (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This website is a software distribution page for Odin Mod 26.3 for Fabric, presenting a free Minecraft Hypixel SkyBlock utility with installation guidance, compatibility information, feature descriptions, and downloadable builds.

Scam/Impersonation Risk

No phishing, impersonation, malware, or other direct contradiction signals were observed. The page describes a free download with no payment requirement, login form, credential request, or account requirement. Its stated functionality is specific rather than financial: 61+ modules covering dungeon helpers, Floor 7 solvers, render adjustments, keybinds, and Kuudra utilities. That materially reduces the apparent fraud surface, although downloading a third-party game modification remains a software-provenance consideration and should not be treated as equivalent to a verified official release. The domain and available historical record indicate a recently established web presence, so the site's apparent legitimacy is not yet supported by a long operating history. Evidence:

- The homepage describes "Odin Mod 26.3 for Fabric" as free software, provides installation steps, and states that no account is required; no payment, login, or credential-collection mechanism is present.

- The homepage advertises 61+ modules, including dungeon, Floor 7, render, and Kuudra functions, with a prior Fabric build also available.
- Domain registration: 2026, approximately 0.24 years old; creation date 2026-07-03T17:28:48Z.
- The available archive record contains 1 snapshot spanning 1 tracked year; no repurposing or semantic-drift finding was recorded.

Regulatory Verification Notes

The site presents a software utility rather than a financial, brokerage, or investment service, and the supplied content contains no regulated-service claim requiring a financial licence. The operator's real-world identity is not independently verified, and the available site material does not establish a legal entity behind the publication. This is a governance and transparency limitation rather than evidence of impersonation or fraud. The registrar is Eranet International Limited; transport security is provided through a valid domain-validated certificate, which supports secure delivery but does not authenticate the publisher. Evidence:

- The site's hosting path is served through AS214351, associated with FEMOIT - FEMO IT SOLUTIONS LIMITED, GB.
- The site's TLS certificate is issued by YR1, uses domain validation (DV), and is valid to 2026-12-23.
- The domain registrar is Eranet International Limited.

What to Verify Next

Before installing the software, confirm that the downloaded file corresponds to the release and Fabric version described on the site, obtain any available checksum or signed-release information through an independently confirmed channel, and scan the file in an isolated environment. The site's FAQ and compatibility material should also be checked against the installed Minecraft and Fabric versions. If support or publisher details are needed, those channels should be confirmed independently rather than relying solely on contact information presented on the site. Evidence:

- The homepage includes FAQ and compatibility notes relevant to the available Fabric builds.
- The page supplies installation instructions involving placement of the downloaded file in the game's mods directory.
- Behavioral inspection recorded no external network requests, hidden forms, wallet activity, clipboard capture, or cloaking behavior during three successful runs.

Summary Verdict

The website merits a **moderate-trust** posture: its content is coherent and low-risk in purpose, and no scam or impersonation contradictions were identified. Confidence is limited because the operator's identity and governance arrangements remain unverified, so the site reads as apparently legitimate rather than conclusively authenticated.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a useful layer of traffic filtering and reduces direct exposure of the underlying service. The observed path used a CDN edge, while the origin was not independently visible; this is a mitigating infrastructure characteristic, not proof of publisher legitimacy. The identified infrastructure provider was FEMOIT - FEMO IT SOLUTIONS LIMITED, GB.

Closing Assessment

Ordinary browsing may proceed, but software installation should be limited to files whose provenance, integrity, compatibility, and behavior have been independently checked before deployment on a primary system.

Written analysis generated 2026-10-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

3 findings contributed to this verdict, raised by governance, history in the web archive, hosting and network.

01 Governance

- What the site offers, as described on its own pages, limits how high the score can go until more of it can be verified.

Governance rule:gov_business_model_cap

02 History in the web archive

- The web archive has almost no record of this domain, which fits a site that is new.

History in the web archive rule:ARCH_PEN_YOUNG_AND_SPARSE

03 Hosting and network

- The domain was registered less than three months ago.
Hosting and network rule:DNS_NEW_DOMAIN_90D
- The hosting and network setup shows a moderate level of risk indicators.
Hosting and network rule:DNS_RISK_MED
- The domain is young and has almost nothing else set up around it.
Hosting and network rule:DNS_SPARSE_YOUNG_DOMAIN
- The domain is young and has a very small footprint on the network.
Hosting and network rule:DNS_LOW_FOOTPRINT_YOUNG_DOMAIN

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of odinmod.org.

- The request stayed on odinmod.org. It was not redirected to another domain. [CLEAR](#)

- Registration is published under Eranet International Limited. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-03. NOTED
- It is hosted on FEMOIT, from a server in SC. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about odinmod.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
