Full analysis

Overview

Oficina Integrada is a cloud-based SaaS platform for automotive workshops and repair garages, presenting tools for work orders, vehicle records, inventory, point-of-sale activity, electronic invoicing, financial control, customer management, and online access through trial and subscription plans.

Scam/Impersonation Risk

No contradictions were observed: the available evidence identifies no phishing, impersonation, malicious-content, or blacklist-related indicators. The site's commercial presentation is internally coherent with a workshop-management software business, although promotional statements such as "the only system" that improves company communication and references to satisfied customers are marketing claims rather than independently substantiated proof. The domain's long operating history, established public traffic presence, and clean external reputation support an apparently legitimate site assessment without independently proving the real-world operator's identity.

EVIDENCE

- The homepage and product pages describe a coherent workshop-management SaaS offering, with no detected phishing indicators, hidden forms, wallet activity, or suspicious browser behavior.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, 0 malicious search-safety findings, and 0 abuse reports.
- The domain registration record shows creation on 2013-02-06 and an age of 13.52 years.
- The site has a traffic rank of 84394 and is within the global top 1 million.

Regulatory Verification Notes

The supplied pages present Mundomidia Ltda as the provider of Oficina Integrada, and the domain registration record also lists MUNDOMIDIA LTDA; this is consistent with a commercial operator but does not independently verify that identity. The content describes subscription software rather than a financial or investment service, and no regulated licence claim or licence number is presented. Licensing and formal business-disclosure details therefore remain an ordinary transparency item for commercial due diligence, not evidence of scam activity. A third-party broker-reputation check produced no match and does not constitute a legal or regulatory determination.

EVIDENCE

- The homepage, product material, and contact/support content identify the provider as Mundomidia Ltda.
- The website's hosting infrastructure is served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- The site's TLS certificate is issued by WE1 at DV validation level and is valid to 2026-09-29.
- The plan and subscription material does not state a regulated licence, registration number, or regulatory authority.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the legal identity behind the service, obtain the applicable subscription terms, and verify cancellation, refund, and payment-protection arrangements. Official support channels should be confirmed through an independent route, particularly before sharing business or customer information.

EVIDENCE

- The plan and trial pages provide the basis for obtaining written pricing, renewal, cancellation, and refund terms before subscription.
- The contact and support pages provide channels that can be independently authenticated before account or payment activity.
- The company-identification material provides the basis for reconciling the stated provider with an authoritative business registry.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website supporting a high-trust, low-risk posture. The operator's real-world identity remains independently unverified, so legitimacy should be understood as evidence-consistent rather than proven.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with all observed addresses belonging to Cloudflare edge servers and no origin address observable in this analysis. This reduces direct origin exposure and is a mitigating infrastructure signal, but it is not proof of business legitimacy.

Closing Assessment

Routine browsing and ordinary service evaluation are proportionate; before submitting credentials or payment details, independent merchant-identity, contractual, and payment-protection checks should be completed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [oficinaintegrada.com.br](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
